Day 11 | Tuesday

November 17, 2026

11

Decimals: place value and operations

12:45 PM–2:00 PM • Math • 75 min

Decimals, tape rounding and costs

2:15 PM–3:30 PM • Math • 75 min

Week 4 • 2 scheduled blocks • 150 teaching minutes

Estimate. Show the method. Label units. Check the result.

Today’s exact schedule

12:45 PM–2:00 PM • 75 min

Decimals: place value and operations

12:45 PM–12:50 PM	**Start**	5
12:50 PM–12:55 PM	**Recall**	5
12:55 PM–1:10 PM	**Teach**	15
1:10 PM–1:25 PM	**Together**	15
1:25 PM–1:45 PM	**Practise**	20
1:45 PM–1:55 PM	**Check**	10
1:55 PM–2:00 PM	**Wrap up**	5

Math • Math Week 4, Lesson 3

2:15 PM–3:30 PM • 75 min

Decimals, tape rounding and costs

2:15 PM–2:20 PM	**Start**	5
2:20 PM–2:25 PM	**Recall**	5
2:25 PM–2:40 PM	**Teach**	15
2:40 PM–2:55 PM	**Together**	15
2:55 PM–3:15 PM	**Practise**	20
3:15 PM–3:25 PM	**Check**	10
3:25 PM–3:30 PM	**Wrap up**	5

Math • Math Week 4, Lesson 4

Break: 2:00 PM–2:15 PM • 15 minutes • excluded from teaching time

Decimals: place value and operations

Today’s goal: Read metric decimal sizes and perform decimal operations with an estimated check.

Share a prior use of this skill; identify the quantity and unit.

Textbook sections 5.1–5.5 pp.76–81

Exercise Book 5A Q1–11 (pp.32–33); 5B Q1,3 (p.34)

Keep your notebook, textbook, exercise book and chosen calculator ready.

Textbook sections 5.1–5.5 pp.76–81

Recall and reconnect

Use Exercise Book 5A Q4–5 to compare decimals; ask why more digits do not always mean a larger value.

Attempt the short retrieval task independently; explain the method before seeing answers.

Resources: Exercise Book 5A Q1–11 (pp.32–33); 5B Q1,3 (p.34)

Textbook sections 5.1–5.5 pp.76–81

Recall from the Exercise Book | 5A Q4

Put in order from smallest: 0.4, 0.375, 0.41.

Write the operation, working and units before checking.

Textbook sections 5.1–5.5 pp.76–81

Read the value of each digit

1 Decimal places name tenths, hundredths and thousandths of the unit.

2 A trailing zero changes the display, not the value: 0.5 = 0.50.

3 Compare from the largest place value to the smallest.

4 Keep the unit beside each measurement so the decimal has meaning.

Textbook sections 5.1–5.5 pp.76–81

Calculate and locate the decimal point

1 For addition and subtraction, line up decimal points and like places.

2 For multiplication, estimate the product before placing the decimal.

3 For division, check the answer by multiplying back.

4 Compare the final magnitude with your estimate; a tenfold error is a warning.

Textbook sections 5.1–5.5 pp.76–81

Predict the size before entering keys

12.50 + 3.75 = 16.25 mm
2.4 × 3 = 7.2 m
1.75 ÷ 0.25 = 7

For 2.4 × 3, an answer near 7 is sensible—not 0.72 or 72.
For division, seven quarter-units make 1.75 units.

Together: selected 5A Q8–11 parts. Pair-check each decimal point.
Shape Canvas: enter a decimal-size rectangle in mm and explain what each digit means.

Textbook | page 79

Example 5.5 Total of a metric cut list

Find the total length of four pieces: 152.4 mm, 76.2 mm, 38.1 mm, 12.7 mm.

SOLUTION

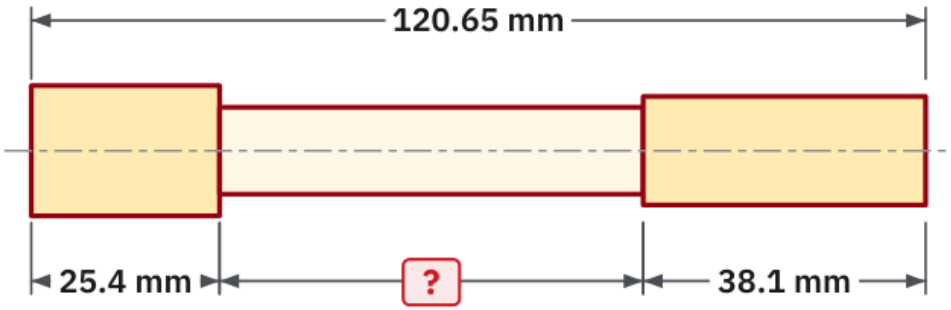

1. Line up the points: each number has one decimal place.
2. Tenths: 4 + 2 + 1 + 7 = 14. Write 4, carry 1.
3. Whole numbers: 152 + 76 + 38 + 12 + 1 (carried) = 279.

Textbook p.79 • Example 5.5 — Aligning decimal cut-list lengths

Textbook | page 79

Example 5.6 Finding a hidden length

A stepped pin is 120.65 mm long overall. Two of its steps are 25.4 mm and 38.1 mm long. How long is the third step?

SOLUTION

1. Add the known steps: 25.4 + 38.1 = 63.5.
2. Subtract from the overall length: write 63.5 as 63.50 and line up the points.
3. 120.65 − 63.50 = 57.15.

Textbook p.79 • Example 5.6 — Hidden length on a stepped pin

Textbook sections 5.1–5.5 pp.76–81

Spot the mistake. Explain the correction.

Is 0.125 larger than 0.5 because it has more digits?

Discuss the method before checking the answer.

Compare equal places: 0.125 is less than 0.500. The first different digit decides.

Textbook sections 5.1–5.5 pp.76–81

Work together

Work Exercise Book 5A Q8–11 selected parts. Pair-check the position of each decimal point.

Work in pairs; alternate calculator operator and checker. Show units and an estimated answer.

Resources: Exercise Book 5A Q1–11 (pp.32–33); 5B Q1,3 (p.34)

Textbook sections 5.1–5.5 pp.76–81

Guided practice | 5A Q8

Add. 63.5 + 9.53 + 0.8

Work with a partner. Take turns explaining the next step.

Textbook sections 5.1–5.5 pp.76–81

Compare your method | 5A Q8

Add. 63.5 + 9.53 + 0.8

CHECK TOGETHER

73.83

Textbook sections 5.1–5.5 pp.76–81

Your scheduled practice

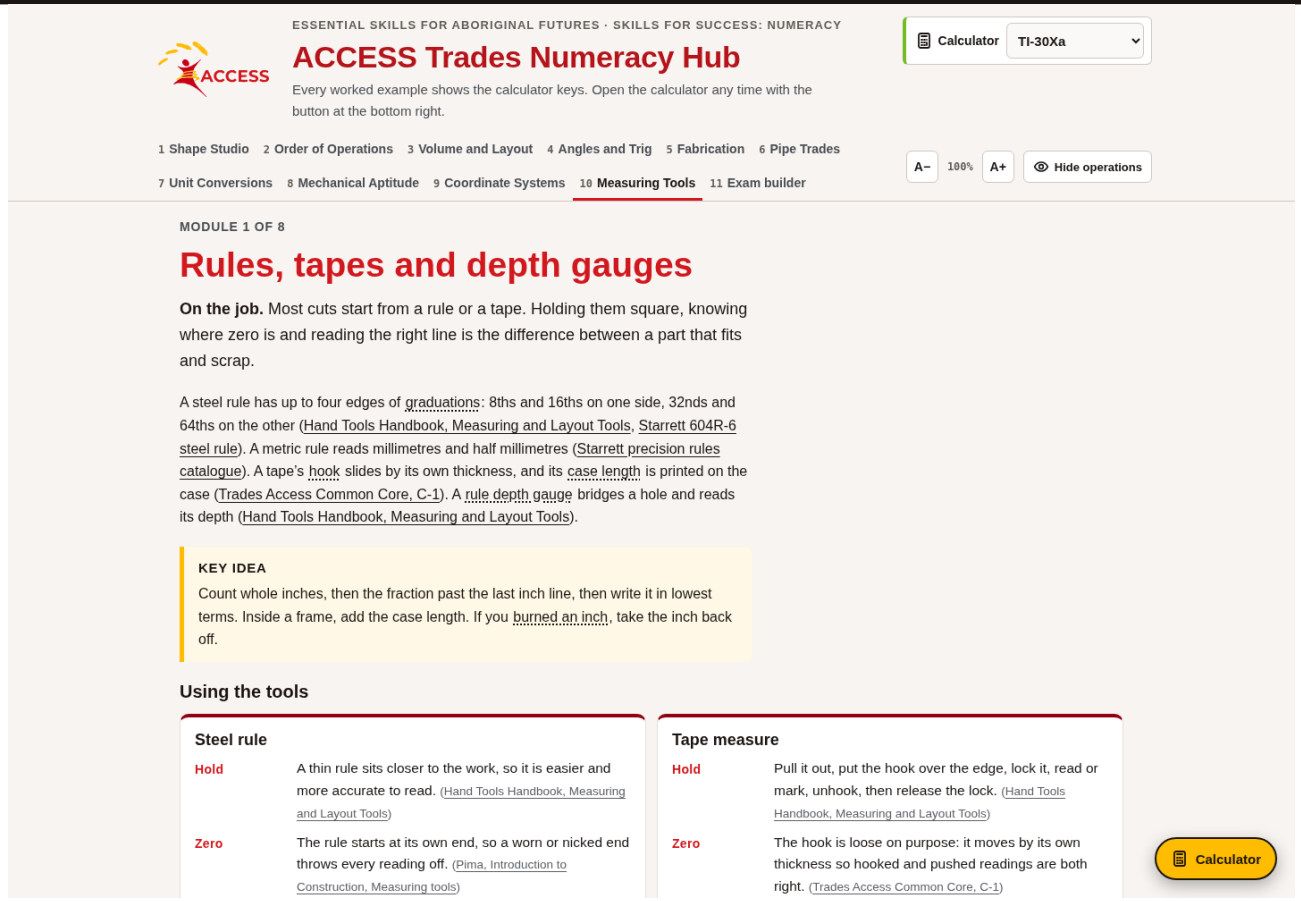

Complete Exercise Book 5A Q1–7 plus 5B Q1,3. Display one decimal-size rectangle in Shape Canvas and explain what each digit means.

Solve on paper first; use the tool to check; correct one error with a written reason.

Resources: Exercise Book 5A Q1–11 (pp.32–33); 5B Q1,3 (p.34)

Textbook sections 5.1–5.5 pp.76–81

Open Numeracy Hub

Navigation example. Use the values and units in the assigned task.

Textbook sections 5.1–5.5 pp.76–81

Practise in Numeracy Hub and Shape Canvas

1. Open Numeracy Hub Measuring Tools and read a metric rule before revealing its answer.

2. Enter one assigned decimal rectangle dimension in Shape Canvas using mm.

3. Read each digit and unit aloud; compare the label with your paper calculation.

Textbook sections 5.1–5.5 pp.76–81

Practise from the Exercise Book | 5A Q1

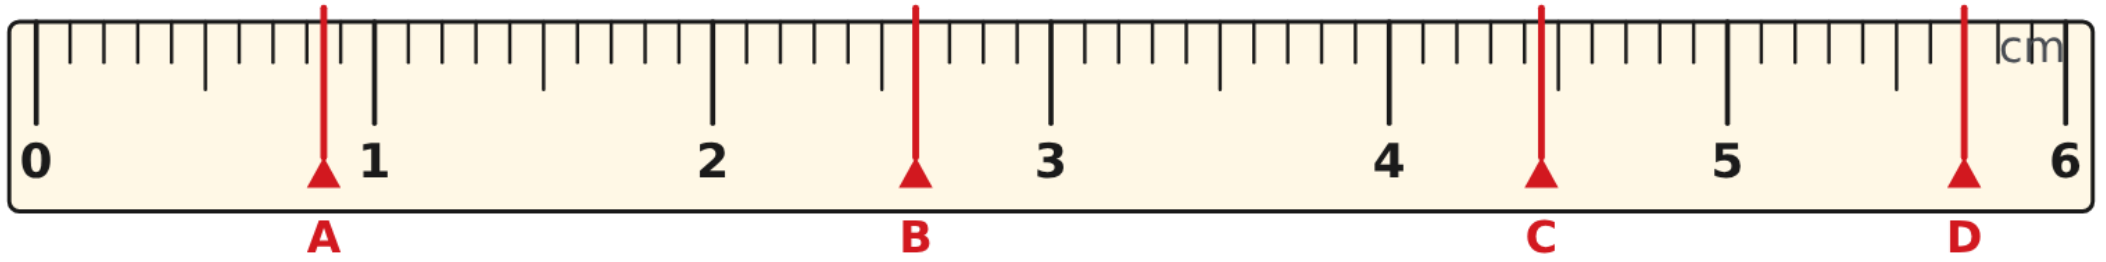

What is the 4 worth in 30.249? Write 0.075 in words.

Write the operation, working and units before checking.

Textbook sections 5.1–5.5 pp.76–81

Practise from the Exercise Book | 5A Q3

Read marks A, B, C and D to the nearest 0.5 mm.

Write the operation, working and units before checking.

Textbook sections 5.1–5.5 pp.76–81

Check independently

Exercise Book 5A Q8 and Q10(a); include an estimate for each answer.

Solve without displayed answers; include working, units and the requested rounding.

Resources: Exercise Book 5A Q1–11 (pp.32–33); 5B Q1,3 (p.34)

Textbook sections 5.1–5.5 pp.76–81

Independent check | 5A Q8

Add. 63.5 + 9.53 + 0.8

Answer independently. Keep worked solutions closed.

Textbook sections 5.1–5.5 pp.76–81

Independent check | 5A Q10a

Multiply. (a) 0.6×0.4

Answer independently. Keep worked solutions closed.

Textbook sections 5.1–5.5 pp.76–81

Wrap up and choose the next step

Ask: What did you learn? Where will you use it? What will you check next time?

Name the math and one other essential skill used; write the next practice step.

Resources: Exercise Book 5A Q1–11 (pp.32–33); 5B Q1,3 (p.34)

Textbook sections 5.1–5.5 pp.76–81

Break

2:00 PM–2:15 PM

Return ready for: Decimals, tape rounding and costs

This break is excluded from teaching minutes.

Decimals, tape rounding and costs

Today’s goal: Convert fractions and decimals, round an inch size to the requested graduation, and calculate a simple cost.

Share a prior use of this skill; identify the quantity and unit.

Textbook sections 5.6–5.7 pp.82–87

Exercise Book 5A Q12–15 (p.33); 5B Q2,4,7 (p.34)

Keep your notebook, textbook, exercise book and chosen calculator ready.

Textbook sections 5.6–5.7 pp.82–87

Recall and reconnect

Share the decimal equivalents of 1/2 and 1/4. Check that a money answer and a tape answer use different rounding.

Attempt the short retrieval task independently; explain the method before seeing answers.

Resources: Exercise Book 5A Q12–15 (p.33); 5B Q2,4,7 (p.34)

Textbook sections 5.6–5.7 pp.82–87

Move between fractions and decimals

1. A fraction is a division: numerator ÷ denominator.

2. Keep calculator precision until the question asks for a rounded result.

3. To find the nearest sixteenth, multiply the fractional inch by 16 and round.

4. Write the rounded count over 16, then reduce; carry a whole inch if needed.

Textbook sections 5.6–5.7 pp.82–87

Match the answer to its use

1 A tape result must match the requested graduation.

2 Cost = quantity × price per unit; check that the units match.

3 Round a final money amount to cents when the question requires it.

4 Use an estimate to check whether the total cost is reasonable.

Textbook sections 5.6–5.7 pp.82–87

Round only to the requested output

3/8 = 3 ÷ 8 = 0.375
2.71 in to nearest 1/16: 0.71 × 16 = 11.36
Nearest whole count = 11 → 2 11/16 in

Classroom cost: 4 pieces × 1.25 m × $8.40/m = $42.00.
Units show why metres cancel to leave dollars.

Together: 5A Q12–14 and 5B Q2. Explain each final rounding rule.
Compare the same fraction and decimal dimension in Shape Canvas.

Textbook | page 84

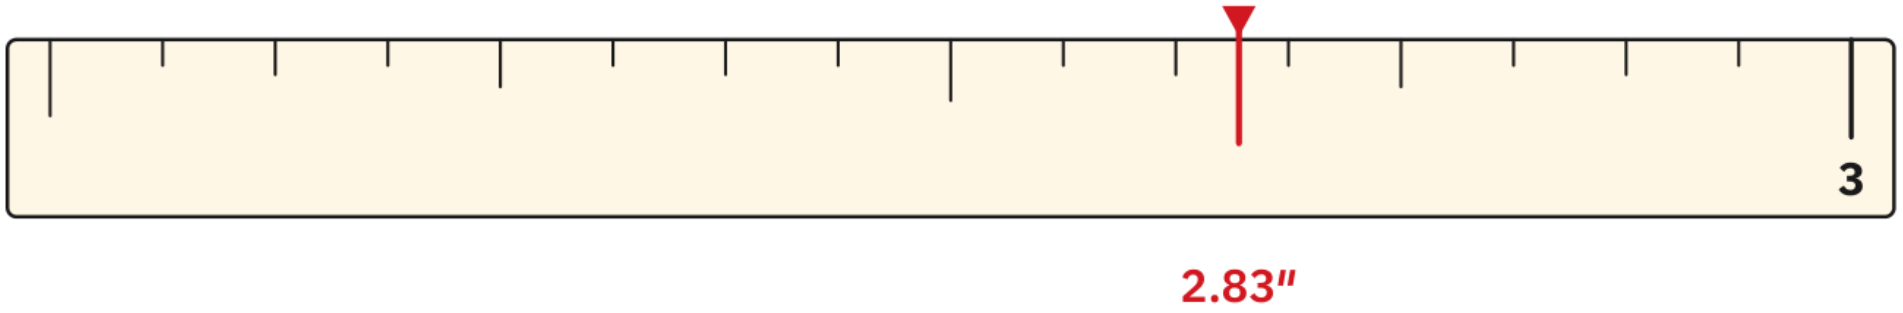

Figure 5.4 The half inch from $2\frac{1}{2}$ in to 3 in, marked in 32nds. 2.83 in lies between the $2\frac{26}{32}$ line and the $2\frac{27}{32}$ line, a little closer to $2\frac{27}{32}$.

Textbook p.84 • Figure 5.4 — Locating a decimal inch on a graduated rule

Textbook sections 5.6–5.7 pp.82–87

Textbook | page 84

Example 5.11 Marking 2.83 in on a tape

A calculation gives 2.83 in. Change it to the nearest $\frac{1}{16}$ in, and to the nearest $\frac{1}{32}$ in.

SOLUTION

1. Keep the 2 inches. The decimal part is 0.83.
2. Nearest $\frac{1}{16}$: $0.83 \times 16 = 13.28$, which rounds to 13. That gives $\frac{13}{16}$, so $2\frac{13}{16}$ in.
3. Nearest $\frac{1}{32}$: $0.83 \times 32 = 26.56$, which rounds to 27. That gives $\frac{27}{32}$, so $2\frac{27}{32}$ in.

Textbook p.84 • Example 5.11 — Rounding to sixteenths and thirty-seconds

Textbook sections 5.6–5.7 pp.82–87

Spot the mistake. Explain the correction.

Can you round every intermediate decimal to two places because money uses cents?

Discuss the method before checking the answer.

No. Keep precision through the calculation; round only the final result to its requested unit.

Textbook sections 5.6–5.7 pp.82–87

Work together

Work Exercise Book 5A Q12–14 and 5B Q2 in pairs. Show why each rounded answer meets the requested unit.

Work in pairs; alternate calculator operator and checker. Show units and an estimated answer.

Resources: Exercise Book 5A Q12–15 (p.33); 5B Q2,4,7 (p.34)

Textbook sections 5.6–5.7 pp.82–87

Guided practice | 5A Q12

Change $\frac{7}{8}$ and $3\frac{1}{4}$ to decimals.

Work with a partner. Take turns explaining the next step.

Textbook sections 5.6–5.7 pp.82–87

Compare your method | 5A Q12

Change $\frac{7}{8}$ and $3\frac{1}{4}$ to decimals.

CHECK TOGETHER

0.875 and 3.25

Textbook sections 5.6–5.7 pp.82–87

Your scheduled practice

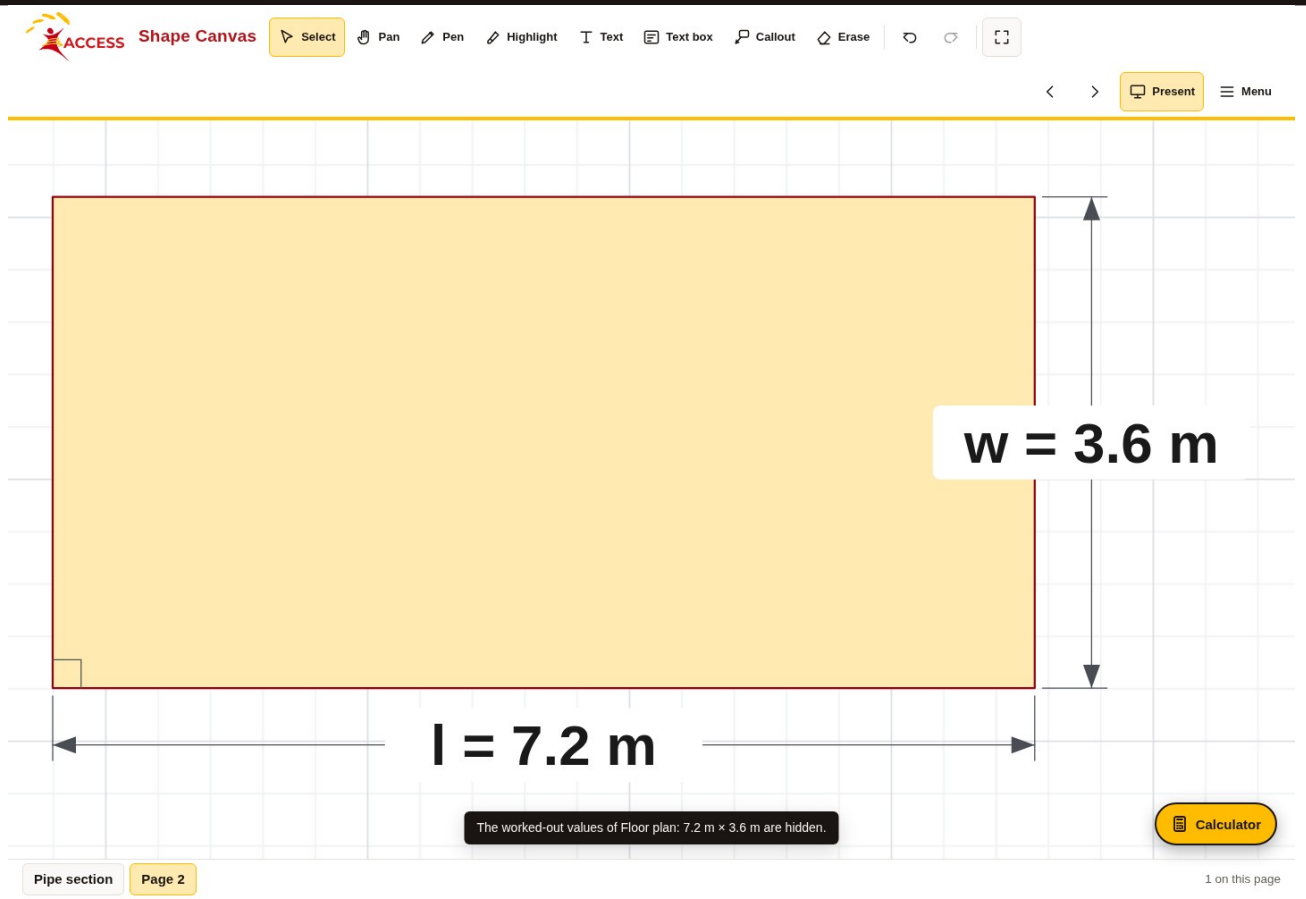

Complete Exercise Book 5A Q15, 5B Q4,7. Compare fraction and decimal entries in Shape Canvas; write a cost calculation with a reasonableness check.

Solve on paper first; use the tool to check; correct one error with a written reason.

Resources: Exercise Book 5A Q12–15 (p.33); 5B Q2,4,7 (p.34)

Textbook sections 5.6–5.7 pp.82–87

Open Shape Canvas

Navigation example. Use the values and units in the assigned task.

Textbook sections 5.6–5.7 pp.82–87

Practise in Numeracy Hub and Shape Canvas

1. Use Numeracy Hub Calculator to convert an assigned fraction to a decimal.

2. In Shape Canvas, compare the same in dimension entered in fraction and decimal form.

3. Record the requested tape rounding or final cost on paper and check its units.

Textbook sections 5.6–5.7 pp.82–87

Practise from the Exercise Book | 5A Q15

Change 0.29 in to the nearest $\frac{1}{16}$ in.

Write the operation, working and units before checking.

Textbook sections 5.6–5.7 pp.82–87

Practise from the Exercise Book | 5B Q4

An order has 25 bolts at $0.46 each and 25 nuts at $0.12 each. What is the total?

Write the operation, working and units before checking.

Textbook sections 5.6–5.7 pp.82–87

Check independently

Exercise Book 5A Q13 and 5B Q7; give simplest fractions and the tape reading.

Solve without displayed answers; include working, units and the requested rounding.

Resources: Exercise Book 5A Q12–15 (p.33); 5B Q2,4,7 (p.34)

Textbook sections 5.6–5.7 pp.82–87

Independent check | 5A Q13

Change 0.875 and 0.08 to fractions in lowest terms.

Answer independently. Keep worked solutions closed.

Textbook sections 5.6–5.7 pp.82–87

Independent check | 5B Q7

A drawing gives a length of 3.38 in. What do you mark on the tape, to the nearest $\frac{1}{16}$ in?

Answer independently. Keep worked solutions closed.

Textbook sections 5.6–5.7 pp.82–87

Wrap up and choose the next step

Ask: What did you learn? Where will you use it? What will you check next time?

Name the math and one other essential skill used; write the next practice step.

Resources: Exercise Book 5A Q12–15 (p.33); 5B Q2,4,7 (p.34)

Textbook sections 5.6–5.7 pp.82–87
