Daily math
Instructor guide

October 29–December 16, 2026

26	50	64.75
teaching days	scheduled blocks	instructional hours

Teach each day from its own deck.

This companion preserves the exact dates, block times, assigned practice and seven teaching phases from the supplied schedule. Each lesson includes instructor prompts, learner actions, materials, textbook references and a clearly marked assessment key.

Keep this guide with the instructor
Independent-check answer keys belong in this guide and the instructor’s speaker notes. Student PDFs omit those keys; completed teaching examples remain visible where they explain a method.

Authority: the active visible Carpentry Schedule and Math Week 1–8 worksheets in the supplied Intake 141 workbook. Hidden earlier schedules are excluded.

ACCESS Trades Numeracy Textbook • Exercise Book • Answer Key
Shape Canvas • Numeracy Hub
ACCESS CARPENTRY SLIDES.pptx

Prepare, teach, check, adapt

1 Open the correct dated deck
Confirm the date, exact block times and topic headings against the day map. Have the assigned ACCESS textbook and Exercise Book pages ready. Use the same selected calculator model throughout.

2 Use Presenter View and speaker notes
Open the PowerPoint in Presenter View to read the teaching prompts privately. Project the learner slide only. Use this guide for the full seven-phase sequence, source references, materials and teacher-only assessment answers.

3 Share phase time across expanded slides
The expanded concept, worked example, image, activity and practice slides sit inside the original phase allocation. They do not create extra teaching minutes. For example, all slides supporting a 15-minute Teach phase share those 15 minutes. Preserve each scheduled break and end time.

4 Follow conditional activities as written
“If ready,” “as time allows,” “optional” and “extension” identify conditional paths. Complete the scheduled core work first and use evidence of learner readiness to choose a path. Select only taught Numeracy Hub topics. Do not turn every optional activity into a compulsory addition.

5 Keep attempts independent when required
During an independent check, close worked answers and hide Shape Canvas target values. Record assistance separately. Use teacher answers after collecting or reviewing the attempt. Worked teaching examples may contain solutions; student PDF files exclude the independent-check answer keys.

6 Save generated practice before checking
Numeracy Hub values vary. Retain the generated question or saved code and use its own worked answers after the learner attempts it. Fixed book answer lists do not apply to a newly generated question.

7 Use assessment to choose the next step
The workbook’s readiness checks are formative. No official KPU entry standard or pass mark is assumed. If a skill has not been taught, record “not yet taught” instead of judging readiness from it. Use errors to select the next book questions and tool practice.

Schedule exceptions

November 26 has only 2:15–3:30 PM math. December 4 has only 12:45–2:00 PM math. December 15 is First Aid, with no math deck. The 24 two-block math days include a 15-minute break; breaks are excluded from the 64.75 teaching hours.

One deck per scheduled math day

Exact topics and teaching times • Times are local to the supplied class schedule

DAY / DATE	BLOCK TIMES	SCHEDULED TOPICS
01 Thu, Oct 29 **Week 1 • p.5–6**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Whole numbers and estimation Calculator basics and checking
02 Fri, Oct 30 **Week 1 • p.7–8**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Quantities, averages and word problems Cut-list practice and rounding
03 Mon, Nov 2 **Week 2 • p.9–10**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	BEDMAS: choosing the correct order BEDMAS in cut lists and frames
04 Tue, Nov 3 **Week 2 • p.11–12**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Brackets, squares and square roots Calculation checking workshop
05 Wed, Nov 4 **Week 2 • p.13–14**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Fractions and inch-tape markings Tape and rule reading practice
06 Thu, Nov 5 **Week 2 • p.15–16**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Equivalent fractions and comparing lengths Mixed numbers and fraction calculator entry
07 Fri, Nov 6 **Week 2 • p.17–18**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Marking fractional dimensions Fraction foundations checkpoint
08 Mon, Nov 9 **Week 3 • p.19–20**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Adding fractional lengths Subtracting and regrouping fractions
09 Tue, Nov 10 **Week 3 • p.21–22**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Repeated pieces and equal groups Fraction operations: check and retry
10 Mon, Nov 16 **Week 4 • p.23–24**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Fraction addition and subtraction: job practice Fraction cut lists, centre lines and kerf
11 Tue, Nov 17 **Week 4 • p.25–26**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Decimals: place value and operations Decimals, tape rounding and costs
12 Wed, Nov 18 **Week 4 • p.27–28**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Percent: part of a whole Waste allowance and purchase quantities
13 Thu, Nov 19 **Week 4 • p.29–30**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Ratios, rates and proportions Scale drawings and weekly check

One deck per scheduled math day

Exact topics and teaching times • Times are local to the supplied class schedule

DAY / DATE	BLOCK TIMES	SCHEDULED TOPICS
14 Tue, Nov 24 **Week 5 • p.31–32**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Measurement systems and readable dimensions Exact conversion factors and mixed-unit practice
15 Wed, Nov 25 **Week 5 • p.33–34**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Reading and substituting into formulas Rearranging formulas and checking backwards
16 Thu, Nov 26 **Week 5 • p.35**	2:15 PM–3:30 PM	Hidden dimensions: square roots and formula checks
17 Fri, Nov 27 **Week 5 • p.36–37**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Perimeter, frame lengths and material totals Circumference, arcs and perimeter consolidation
18 Mon, Nov 30 **Week 6 • p.38–39**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Area and material coverage Composite areas, openings and surface coverage
19 Tue, Dec 1 **Week 6 • p.40–41**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Volume of boxes and prisms Cylinders, capacity and missing heights
20 Wed, Dec 2 **Week 6 • p.42–43**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Angles, triangles and drawing interpretation Pythagorean theorem and brace lengths
21 Thu, Dec 3 **Week 6 • p.44–45**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Checking square, diagonals and layout SOH CAH TOA and missing sides
22 Fri, Dec 4 **Week 6 • p.46**	12:45 PM–2:00 PM	Angles, grades and carpentry slope applications
23 Mon, Dec 7 **Week 7 • p.47–48**	12:45 PM–2:00 PM 2:15 PM–3:30 PM	Carpentry drawing: floor layout and cut list Materials practice: sheeting and allowance
24 Thu, Dec 10 **Week 7 • p.49–50**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Skill clinics: practise your priority topic Mixed-topic calculation practice
25 Mon, Dec 14 **Week 8 • p.51–52**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Review: numbers, units and formulas Review: geometry and job problems
26 Wed, Dec 16 **Week 8 • p.53–54**	9:00 AM–10:15 AM 10:30 AM–12:00 PM	Readiness check: 12 core questions Corrections and a personal practice plan

DAY 01 / WEEK 1 / W01-L01

Whole numbers and estimation

Thursday, October 29, 2026 • 9:00 AM–10:15 AM • 75 min • Math

GOAL Read whole-number quantities; estimate and calculate a cut-list total; explain why an answer is reasonable.	**READ** Textbook Chapter 1 pp.10–21; Chapter 2 pp.28–31,39
ASSIGNED PRACTICE Exercise Book 1A Q1–10 (p.6), Q11–17 (pp.6–7)	**TOOL ACTIVITY** Numeracy Hub: select TI-30Xa or Sharp EL-531XT; open Calculator. Shape Canvas: place a rectangle and read its dimension labels in mm.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Use Exercise Book 1A Q3,5,9 without a calculator. Ask which operation finds an offcut.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:25 AM **15 min**	Model place value, rounding and the steps to estimate, calculate and check using Textbook Chapter 1. Demonstrate clearing and matching the selected calculator model.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 9:25 AM to 9:40 AM **15 min**	Work Exercise Book 1A Q11,13,15 together. Learners estimate first, then compare hand and calculator methods.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 9:40 AM to 10:00 AM **20 min**	Complete Exercise Book 1A Q1–10 and Q12,14,16,17 as time allows. On Shape Canvas, set a rectangle to 1,200 mm by 800 mm and read both sizes; geometry is preview only.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 10:00 AM to 10:10 AM **10 min**	Exercise Book 1A Q5 and Q10; explain one estimate and show the operation used.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

1A Q5 = 3,460; Q10 estimate = 1,000. Answer Key p.6. Answer Key pp.5–8

Next: practise calculator keys and checking methods.

SOURCE: 'Math Week 1'!A10:E10; 'Carpentry Schedule'!E3; steps 'Math Week 1'!A25:F25 through 'Math Week 1'!A31:F31; answers 'Math Week 1'!B33. Original deck slides 3, 4, 5.

DAY 01 / WEEK 1 / W01-L02

Calculator basics and checking

Thursday, October 29, 2026 • 10:30 AM–12:00 PM • 90 min • Calculation Practice

GOAL Use the chosen calculator correctly and check an answer with an estimate or inverse operation.	**READ** Textbook Chapter 2 pp.28–33,39; Chapter 1 pp.12–21
ASSIGNED PRACTICE Exercise Book 2A Q1–3,6 (p.13); 1A Q11–17,20 (pp.6–7)	**TOOL ACTIVITY** Numeracy Hub: Calculator: choose TI-30Xa or Sharp EL-531XT. Keep the same model throughout.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Ask learners to clear the display and enter 23 × 23. Check which model they use.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Demonstrate clear, correction, square, square root and change-sign keys. Use the model-specific key sequences in the Textbook.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Solve Exercise Book 2A questions 1–3 together. Compare square-root entry on the two models; estimate before checking.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Complete 2A question 6 and selected 1A questions 11–17,20. Record the calculation, keys and answer; use inverse operations to verify two results.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Redo Exercise Book 2A questions 1 and 3 independently. Explain one checking method.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

2A question 1 = 4,147; question 3 = 37. Answer Key page 8. Answer Key pp.6,8

Next: choose operations for quantities, averages and purchase decisions.

SOURCE: 'Math Week 1'!A11:E11; 'Carpentry Schedule'!E5; steps 'Math Week 1'!A42:F42 through 'Math Week 1'!A48:F48; answers 'Math Week 1'!B50. Original deck slides 6, 7, 8.

DAY 02 / WEEK 1 / W01-L03

Quantities, averages and word problems

Friday, October 30, 2026 • 9:00 AM–10:15 AM • 75 min • Math

GOAL Choose operations from a job problem and explain the difference between full pieces and purchase quantities.	**READ** Textbook Chapter 1 pp.15–21
ASSIGNED PRACTICE Exercise Book 1A Q15–19 (p.7); 1B Q2–5 (p.8)	**TOOL ACTIVITY** Numeracy Hub: Calculator. Draw quantities and groups on paper before keying.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Ask what information is given, what must be found and which unit the answer needs.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:25 AM **15 min**	Model repeated groups, equal sharing and an average using 1A question 19. Show why a purchase quantity may need rounding up.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 9:25 AM to 9:40 AM **15 min**	Solve 1B questions 2–3. Label the number needed and the number of full supplier units separately.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 9:40 AM to 10:00 AM **20 min**	Complete 1A questions 15–18 and 1B questions 4–5. Explain each operation and check the answer using multiplication or addition.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 10:00 AM to 10:10 AM **10 min**	Complete 1A question 19 and 1B question 3 independently.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

1A question 19 = 65. 1B question 3 = 112 bolts; buy 5 boxes. Answer Key page 6.

Next: combine these methods in a complete cut-list calculation.

SOURCE: 'Math Week 1'!A12:E12; 'Carpentry Schedule'!F3; steps 'Math Week 1'!A60:F60 through 'Math Week 1'!A66:F66; answers 'Math Week 1'!B68. Original deck slides 9, 10, 11.

DAY 02 / WEEK 1 / W01-L04

Cut-list practice and rounding

Friday, October 30, 2026 • 10:30 AM–12:00 PM • 90 min • Calculation Practice

GOAL Solve multi-step stock problems and distinguish rounding up purchases from rounding down complete pieces.	**READ** Textbook sections 1.4–1.8 pp.12–21; sections 2.11 p.39
ASSIGNED PRACTICE Exercise Book 1B Q1–5 (p.8); 1C Q1–2 (p.10)	**TOOL ACTIVITY** Shape Canvas: add three rectangles to represent the cut pieces; label the original stock length using Text. Numeracy Hub Calculator: check the numerical totals.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Ask why buying boxes and cutting full pieces need different rounding decisions. Retrieve 1A Q18 (p.7).	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Model Exercise Book 1B Q1: identify stock, total used and remainder. Contrast a purchase quantity with the number of complete pieces from stock.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Work Exercise Book 1B Q2–3 in pairs. Learners mark given quantities, choose operations, and justify purchase rounding.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Solve Exercise Book 1B Q4–5 and 1C Q1–2. Recreate one cut-list sketch on Shape Canvas; write the equation before checking. Use extra time to correct and explain a second method.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Rework Exercise Book 1B Q3 and Q5 independently; explain why the two rounding directions differ.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

1B Q3 = 112 bolts, 5 boxes; Q5 = 13 pieces and a 6 in offcut. Answer Key p.6. Answer Key p.6

Next: Next week: order of operations, then fraction and tape-reading foundations.

SOURCE: 'Math Week 1'!A13:E13; 'Carpentry Schedule'!F5; steps 'Math Week 1'!A77:F77 through 'Math Week 1'!A83:F83; answers 'Math Week 1'!B85. Original deck slides 12, 13, 14.

DAY 03 / WEEK 2 / W02-L01

BEDMAS: choosing the correct order

Monday, November 2, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Evaluate grouped expressions and show left-to-right order for equal-ranked operations.	**READ** Textbook Chapter 3 pp.44–51; Chapter 2 pp.31–33
ASSIGNED PRACTICE Exercise Book 3A Q1–10 (p.19); 3B Q2–3 (p.21)	**TOOL ACTIVITY** Numeracy Hub: Order of Operations, then Module 1 The order: BEDMAS; use Show steps, Next and Back. Begin with Easy practice.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Compare Exercise Book 3A Q1 and Q4. Ask what changes when brackets are present.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model brackets, exponents and left-to-right rules. In Numeracy Hub, step through an expression, then key the same grouping on the selected calculator.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Solve Exercise Book 3A Q2–7 with a partner. Point to the next operation before calculating.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 3A Q8–10 and 3B Q2–3. Try two Easy Numeracy Hub tasks; record expression, order and checked result, not only the screen answer.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 3A Q8–9 without displayed solutions; mark each operation in order.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

3A Q8 = 16; Q9 = 20. 3B Q2 = 4,450 mm; Q3 = 6 in. Answer Key p.10. Answer Key pp.9–10

Next: apply brackets and left-to-right rules to cut lists.

SOURCE: 'Math Week 2'!A10:E10; 'Carpentry Schedule'!B17; steps 'Math Week 2'!A31:F31 through 'Math Week 2'!A37:F37; answers 'Math Week 2'!B39. Original deck slides 16, 17, 18.

DAY 03 / WEEK 2 / W02-L02

BEDMAS in cut lists and frames

Monday, November 2, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Write one correct expression for a cut list or frame and evaluate it in the right order.	**READ** Textbook Chapter 3 pp.44–51
ASSIGNED PRACTICE Exercise Book 3B Q1–3 (p.21); 3C Q2–3 (p.23)	**TOOL ACTIVITY** Numeracy Hub: Order of Operations, then The order: BEDMAS. Use Show steps after the paper attempt.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Compare 2 × (10 + 5) with 2 × 10 + 5. Ask learners to explain the grouping.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model a total quantity, then an offcut: original stock minus all pieces and all stated cuts.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Solve 3B questions 1–2. Underline the group inside brackets before entering keys.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete 3B question 3 and 3C questions 2–3. Draw the pieces, write one expression and compare with the Numeracy Hub steps.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Redo 3C questions 2–3 and explain the brackets.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
3C question 2 = 900 mm; question 3 = 1,188 mm. Answer Key page 10.

Next: squares, roots and bracketed calculations.

SOURCE: 'Math Week 2'!A11:E11; 'Carpentry Schedule'!B19; steps 'Math Week 2'!A48:F48 through 'Math Week 2'!A54:F54; answers 'Math Week 2'!B56. Original deck slides 19, 20, 21.

DAY 04 / WEEK 2 / W02-L03

Brackets, squares and square roots

Tuesday, November 3, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Explain what an exponent or root acts on and avoid applying it to the wrong part of an expression.	**READ** Textbook Chapter 3 pp.45–51; Chapter 2 pp.31–33
ASSIGNED PRACTICE Exercise Book 3A Q4–10 (p.19); 2A Q2–3 (p.13)	**TOOL ACTIVITY** Numeracy Hub: Order of Operations, then Common mistakes; choose only taught examples.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask whether $(6 - 4)^2$ means the same as $6^2 - 4^2$. Explain before calculating.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Use 3A questions 8–10 to show exponent scope and bracket order. Model square-root entry on the learner's calculator.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work 3A questions 4–7. Identify the next operation aloud and compare paper and calculator results.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Solve 3A questions 8–10 and 2A questions 2–3. Make a deliberate bracket error, explain it, then correct it.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Complete 3A questions 8–9 with each operation numbered.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

3A question 8 = 16; question 9 = 20. Answer Key page 10. Answer Key pp.8,10

Next: practise spotting and correcting calculation errors.

SOURCE: 'Math Week 2'!A12:E12; 'Carpentry Schedule'!C17; steps 'Math Week 2'!A66:F66 through 'Math Week 2'!A72:F72; answers 'Math Week 2'!B74. Original deck slides 22, 23, 24.

DAY 04 / WEEK 2 / W02-L04

Calculation checking workshop

Tuesday, November 3, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Use estimation, inverse operations and a second method to check calculations.	**READ** Textbook Chapter 2 p.39; Chapter 3 pp.44–51
ASSIGNED PRACTICE Exercise Book 1A Q20 (p.7); 3B Q2–3 (p.21); 3C Q2–3 (p.23)	**TOOL ACTIVITY** Numeracy Hub: Order of Operations: two Easy questions from taught topics; retain the question and written working.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask each learner to name one common keying error and one way to detect it.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Compare a plausible-looking wrong answer with a checked answer. Model inverse operations and substituting a missing length back into its total.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Recheck 3B question 2 in two ways: add the four sides and use the grouped formula.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete 3B question 3 and 3C questions 2–3. Add an estimate and a check line to every solution. Finish with two new Numeracy Hub questions.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Explain why 3C question 2 is 900 mm and show that it gives the stated 3,000 mm perimeter.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

3B question 2 = 4,450 mm; 3C question 2 = 900 mm; question 3 = 1,188 mm. Answer Key page 10. Answer Key pp.6,10

Next: connect fractions to real inch-tape marks.

SOURCE: 'Math Week 2'!A13:E13; 'Carpentry Schedule'!C19; steps 'Math Week 2'!A83:F83 through 'Math Week 2'!A89:F89; answers 'Math Week 2'!B91. Original deck slides 25, 26, 27.

DAY 05 / WEEK 2 / W02-L05

Fractions and inch-tape markings

Wednesday, November 4, 2026 • 9:00 AM–10:15 AM • 75 min • Math

GOAL Read inch graduations, reduce fractions and compare fractional lengths using a common denominator.	**READ** Textbook sections 4.1–4.4 pp.56–61; sections 4.5 pp.62–63
ASSIGNED PRACTICE Exercise Book 4A Q1–4 (p.25), Q6–11 (p.26)	**TOOL ACTIVITY** Numeracy Hub: Measuring Tools: rule/tape explanations; Fabrication tape-reading practice. Shape Canvas: choose in units and show rectangle dimensions.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Ask learners to locate 1/2, 1/4 and 1/8 on an inch rule; use Exercise Book 4A Q1 to check fraction vocabulary.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:25 AM **15 min**	Model reading from zero, counting graduations, reducing fractions and converting mixed/improper forms. Keep calculator use after the visual explanation.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 9:25 AM to 9:40 AM **15 min**	Complete Exercise Book 4A Q3 and Q6–7 with a projected tape/rule. Pair learners to explain equivalent marks.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 9:40 AM to 10:00 AM **20 min**	Complete Exercise Book 4A Q2,4,8–11. Read real rule/tape marks and compare them with the Numeracy Hub. Use extra time for guided rereading; finer 32nds/64ths are extension.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 10:00 AM to 10:10 AM **10 min**	Exercise Book 4A Q6 and Q8; explain which fraction is longer and how much longer.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

4A Q6 = 7/16 and 9/16. Q8: 5/8 in is longer than 9/16 in by 1/16 in. Answer Key p.13. Answer Key pp.11–13

Next: practise reading and comparing marks on an inch rule.

Fine-graduation clarification: Assigned 4A Q4 includes supported 32nd-inch reading. The scheduled 32nd/64th fraction items remain required; only additional fine-graduation work is extension.

SOURCE: 'Math Week 2'!A14:E14; 'Carpentry Schedule'!D13; steps 'Math Week 2'!A101:F101 through 'Math Week 2'!A107:F107; answers 'Math Week 2'!B109. Original deck slides 28, 29, 30.

DAY 05 / WEEK 2 / W02-L06

Tape and rule reading practice

Wednesday, November 4, 2026 • 10:30 AM–12:00 PM • 90 min • Math

GOAL
Read inch markings consistently and record each reading in lowest terms.

READ
Textbook Chapter 4 pp.56–59

ASSIGNED PRACTICE
Exercise Book 4A Q1–4 (p.25); Q6–9 (p.26)

TOOL ACTIVITY
Numeracy Hub: Measuring Tools and Fabrication tape-reading practice. Use an actual inch rule or tape alongside the display.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Locate zero, one inch, one half and one quarter; ask what the smallest shown graduation represents.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Model counting spaces rather than lines, then reducing the reading. Explain why the graduation determines the precision.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Read 4A question 3 together. Partners point to each mark and say the whole number and fraction aloud.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Complete 4A questions 1–4 and 6–9. Partners create four marks for one another to read; verify with the rule and record corrections.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Read marks A–D in 4A question 3 without prompts.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
A = 9/16 in; B = 1 5/8 in; C = 2 1/4 in; D = 2 13/16 in. Answer Key page 13.

Next: compare and order fractional sizes.

SOURCE: 'Math Week 2'!A15:E15; 'Carpentry Schedule'!D15; steps 'Math Week 2'!A118:F118 through 'Math Week 2'!A124:F124; answers 'Math Week 2'!B126. Original deck slides 31, 32, 33.

DAY 06 / WEEK 2 / W02-L07

Equivalent fractions and comparing lengths

Thursday, November 5, 2026 • 9:00 AM–10:15 AM • 75 min • Math

GOAL Use equivalent fractions to order dimensions and explain the difference between two lengths.	**READ** Textbook Chapter 4 pp.59–61
ASSIGNED PRACTICE Exercise Book 4A Q6–11 (p.26)	**TOOL ACTIVITY** Shape Canvas: select in units and compare labelled rectangles. Use a fraction strip or rule to explain equivalence.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today’s skill. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Show 1/2 and 8/16 on a rule. Ask why they refer to the same point.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:25 AM **15 min**	Model reducing fractions and creating a common denominator before comparing lengths.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 9:25 AM to 9:40 AM **15 min**	Work 4A questions 6–8 with fraction strips; confirm the longer length on a rule.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 9:40 AM to 10:00 AM **20 min**	Complete 4A questions 9–11. Place three labelled dimensions in order and explain the comparison to a partner.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 10:00 AM to 10:10 AM **10 min**	Complete 4A questions 6 and 8, showing the common denominator.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

Question 6 = 7/16 and 9/16. Question 8: 5/8 in is longer by 1/16 in. Answer Key page 13.

Next: switch between mixed numbers and improper fractions.

SOURCE: 'Math Week 2'!A16:E16; 'Carpentry Schedule'!E13; steps 'Math Week 2'!A136:F136 through 'Math Week 2'!A142:F142; answers 'Math Week 2'!B144. Original deck slides 34, 35, 36.

DAY 06 / WEEK 2 / W02-L08

Mixed numbers and fraction calculator entry

Thursday, November 5, 2026 • 10:30 AM–12:00 PM • 90 min • Math

GOAL Convert mixed and improper fractions and match the calculator display to the written value.	**READ** Textbook Chapter 4 pp.61–63; Chapter 2 p.34
ASSIGNED PRACTICE Exercise Book 4A Q10–13 (p.26); 2A Q9 (p.14)	**TOOL ACTIVITY** Numeracy Hub: Calculator: select the learner's model. Use the Textbook's fraction-key sequence.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Ask how many eighths are in 4 5/8. Check the meaning of numerator and denominator.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Model whole × denominator + numerator, then division with a remainder for the reverse conversion. Read the fraction display aloud.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Complete 4A questions 10–12. Compare paper conversions with calculator displays.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Complete question 13 and practise entering the values in questions 10–12 without changing them. Use 2A question 9 as a supported extension, not an addition-speed test.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Complete 4A questions 10–11 without the calculator, then check.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

Question 10 = 4 5/8 and 3 5/16. Question 11 = 71/16 and 27/4. Answer Key page 13. Answer Key pp.8,13

Next: read and mark fractional dimensions from a drawing.

SOURCE: 'Math Week 2'!A17:E17; 'Carpentry Schedule'!E15; steps 'Math Week 2'!A153:F153 through 'Math Week 2'!A159:F159; answers 'Math Week 2'!B161. Original deck slides 37, 38, 39.

DAY 07 / WEEK 2 / W02-L09

Marking fractional dimensions

Friday, November 6, 2026 • 9:00 AM–10:15 AM • 75 min • Math

GOAL Transfer a labelled inch dimension to a paper strip and check it with a partner.	**READ** Textbook Chapter 4 pp.56–63
ASSIGNED PRACTICE Exercise Book 4A Q3 (p.25), Q8–11 (p.26)	**TOOL ACTIVITY** Shape Canvas: create rectangles with the question's labelled dimensions. Use the labels, not the screen's physical size, to mark a paper strip.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Ask what stays the same when a drawing is zoomed. Distinguish dimensions from screen size.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:25 AM **15 min**	Model start point, whole inches and fractional spaces. Demonstrate a second reading from zero to catch counting errors.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 9:25 AM to 9:40 AM **15 min**	Use the four values in 4A question 3 to mark and label a paper strip; partners verify each mark.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 9:40 AM to 10:00 AM **20 min**	Create four dimension labels from questions 8–11, then mark them on paper. Compare readings, circle disagreements and correct them with a written reason.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 10:00 AM to 10:10 AM **10 min**	Read two partner-created marks and simplify 14/32 and 36/64.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

14/32 = 7/16; 36/64 = 9/16. Tape readings depend on the marks; compare against the labelled dimensions. Answer Key page 13.

Next: check fraction foundations and choose a practice priority.

SOURCE: 'Math Week 2'!A18:E18; 'Carpentry Schedule'!F13; steps 'Math Week 2'!A171:F171 through 'Math Week 2'!A177:F177; answers 'Math Week 2'!B179. Original deck slides 40, 41, 42.

DAY 07 / WEEK 2 / W02-L10

Fraction foundations checkpoint

Friday, November 6, 2026 • 10:30 AM–12:00 PM • 90 min • Math

GOAL Independently read, simplify, compare and convert fractions before progressing to operations.	**READ** Textbook Chapter 4 pp.56–63
ASSIGNED PRACTICE Exercise Book 4A Q3,6,8,10–11 (pp.25–26)	**TOOL ACTIVITY** Use a rule, paper and the chosen calculator for checking after the first attempt. Shape Canvas supports one corrected dimension drawing.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Ask each learner to name the fraction skill they find hardest; review the meaning of simplest form.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Work one different example of each skill without giving the checkpoint answers.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Use fraction strips to explain equivalence; clarify question directions and required units.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Complete 4A questions 3,6,8,10–11 independently. Check, sort errors by reading or number form, and redo missed types with partner-created examples.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Redo one missed type without prompts and explain how the check shows it is correct.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

Use Answer Key page 13. Question 6: 7/16, 9/16; question 8: 5/8 is longer by 1/16; question 10: 4 5/8, 3 5/16; question 11: 71/16, 27/4. Answer Key p.13

Next: Week 3: practise fraction operations before the Week 4 job applications.

SOURCE: 'Math Week 2'!A19:E19; 'Carpentry Schedule'!F15; steps 'Math Week 2'!A188:F188 through 'Math Week 2'!A194:F194; answers 'Math Week 2'!B196. Original deck slides 43, 44, 45.

DAY 08 / WEEK 3 / W03-L01

Adding fractional lengths

Monday, November 9, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Add fractional and mixed-inch lengths using a common denominator.	**READ** Textbook Chapter 4 pp.59–66
ASSIGNED PRACTICE Exercise Book 4A Q14 (p.26); 4B Q2–3 (p.27)	**TOOL ACTIVITY** Shape Canvas: label adjoining rectangles in inches. Use the Numeracy Hub Calculator after writing the sum.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Retrieve equivalent fractions and ask how many sixteenths make one whole.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model a common denominator and carry a full group into the whole-number part. Connect the sum to adjoining pieces.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Solve 4A question 14(a), then 4B question 2 with a labelled strip diagram.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete 4A question 14(b) and 4B question 3. Draw the lengths or layers and show the written addition before calculator checking.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Redo 4A question 14(b) and explain the carry into the whole number.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

4A question 14(b) = 10 5/16. 4B question 3 = 1 1/2 in. Answer Key page 13.

Next: subtract lengths and regroup across a whole inch.

SOURCE: 'Math Week 3'!A10:E10; 'Carpentry Schedule'!B27; steps 'Math Week 3'!A25:F25 through 'Math Week 3'!A31:F31; answers 'Math Week 3'!B33. Original deck slides 48, 49, 50.

DAY 08 / WEEK 3 / W03-L02

Subtracting and regrouping fractions

Monday, November 9, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Find a remaining or missing length by subtracting mixed numbers accurately.	**READ** Textbook Chapter 4 pp.64–66
ASSIGNED PRACTICE Exercise Book 4A Q15 (p.26); 4C Q1–3 (p.29)	**TOOL ACTIVITY** Shape Canvas: show an overall length and labelled parts. Hide one dimension; attempt it on paper before checking.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask how 5 can be written as 4 plus sixteenths. Retrieve one common-denominator example.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model regrouping one whole inch into fractional units and verify by adding the remainder back.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Solve 4A question 15(a) and 4C question 1 with a drawing.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete 4A question 15(b) and 4C questions 2–3. Add the found piece back to the known parts to verify the overall length.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Complete 4A question 15(b) and 4C question 3 independently.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
4A question 15(b) = 4 3/8. 4C question 3 = 4 1/4 in. Answer Key pages 13–14. Answer Key pp.13–14

Next: repeated pieces, halves and equal groups.

SOURCE: 'Math Week 3'!A11:E11; 'Carpentry Schedule'!B29; steps 'Math Week 3'!A42:F42 through 'Math Week 3'!A48:F48; answers 'Math Week 3'!B50. Original deck slides 51, 52, 53.

DAY 09 / WEEK 3 / W03-L03

Repeated pieces and equal groups

Tuesday, November 10, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Use multiplication and division to find repeated fractional lengths and centre lines.	**READ** Textbook Chapter 4 pp.67–70
ASSIGNED PRACTICE Exercise Book 4A Q16–17 (p.26); 4B Q4–5 (p.27); 4C Q5 (p.30)	**TOOL ACTIVITY** Shape Canvas: repeat a labelled rectangle and compare total lengths. Numeracy Hub Calculator: check the exact fractions.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask how repeated addition connects to multiplication and how dividing by two finds a centre.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model multiplying an improper fraction and using a reciprocal for division. Check against a strip drawing.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work 4A questions 16(a) and 17(a), then 4B question 5 with a centre-line sketch.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete remaining parts of 4A questions 16–17, 4B question 4 and 4C question 5. Explain what the division result counts or measures.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Complete 4A question 17(b) and 4B question 5.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

4A question 17(b) = 5 1/4. 4B question 5 = 7 13/16 in. Answer Key page 13. Answer Key pp.13–14

Next: check all four fraction operations and correct weak areas.

SOURCE: 'Math Week 3'!A12:E12; 'Carpentry Schedule'!C27; steps 'Math Week 3'!A60:F60 through 'Math Week 3'!A66:F66; answers 'Math Week 3'!B68. Original deck slides 54, 55, 56.

DAY 09 / WEEK 3 / W03-L04

Fraction operations: check and retry

Tuesday, November 10, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Choose the correct fraction operation, show the working and correct a documented error.	**READ** Textbook Chapter 4 pp.64–70
ASSIGNED PRACTICE Exercise Book 4A Q14–17 (p.26); 4C Q1–3 (p.29)	**TOOL ACTIVITY** Use paper for the first attempt; check with the chosen calculator. Rebuild one missing-length sketch in Shape Canvas.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	State the goal and connect it to a carpentry drawing or job quantity.	Name one use for today's skill. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Present four short situations: total, remainder, repeated pieces and equal sharing. Learners name the operation.	Try first without displayed answers. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model the most common error from Monday's work. Emphasize common denominators for addition/subtraction, not for every operation.	Follow the example; explain the next step. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Pairs explain a method from 4A questions 14–17 without copying the partner's calculation.	Work in pairs; alternate solver and checker. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete one part of each question 14–17 independently, then 4C questions 1–3. Mark, explain and retry one error with a fresh partner-created value.	Show working and units; estimate, then check. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Redo 4A questions 14(a),15(a),16(b),17(b). Give simplest forms.	Answer independently and show the method. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask for one learning point and one skill to practise next.	Record a takeaway and next action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

In order: 1 1/16; 3 5/16; 4 3/8; 5 1/4. Answer Key page 13. Answer Key pp.13–14

Next: Week 4 applies these skills to cut lists and centre lines, then progresses to decimals, percent, ratio and scale.

SOURCE: 'Math Week 3'!A13:E13; 'Carpentry Schedule'!C29; steps 'Math Week 3'!A77:F77 through 'Math Week 3'!A83:F83; answers 'Math Week 3'!B85. Original deck slides 57, 58, 59.

DAY 10 / WEEK 4 / W04-L01

Fraction addition and subtraction: job practice

Monday, November 16, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Add or subtract mixed-inch sizes using common denominators and record the result in lowest terms.	**READ** Textbook sections 4.3–4.6 pp.59–66
ASSIGNED PRACTICE Exercise Book 4A Q10–15 (p.26); 4B Q2–3 (p.27)	**TOOL ACTIVITY** Shape Canvas: set units to in; use a rectangle with fractional dimensions. Numeracy Hub Calculator: check fraction entry using the selected model.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect adding and subtracting fractional lengths to reading a carpentry drawing or preparing a cut list. State the objective.	Share a prior use of this skill; identify the quantity and unit. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Use the Week 3 checks to review common denominators and regrouping. Start with Exercise Book 4A questions 6 and 10.	Attempt the short retrieval task independently; explain the method before seeing answers. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model a common denominator, regrouping across a whole inch and subtraction. Connect the written fraction to a tape mark.	Annotate a worked example; predict the next step and ask questions. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work Exercise Book 4A Q14(a) and Q15(a), then Exercise Book 4B Q2. Learners explain the regrouping to a partner.	Work in pairs; alternate calculator operator and checker. Show units and an estimated answer. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete remaining Exercise Book 4A Q14–15 and 4B Q3. Mark each result on a paper rule; use calculator checking only after the written solution.	Solve on paper first; use the tool to check; correct one error with a written reason. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 4A Q14(b) and Q15(b). Show common denominators and simplified answers.	Solve without displayed answers; include working, units and the requested rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What did you learn? Where will you use it? What will you check next time?	Name the math and one other essential skill used; write the next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

4A Q14(b) = 10 5/16; Q15(b) = 4 3/8. Answer Key p.13. Answer Key pp.11–13

Next: Use regrouping errors for the opening of the fractional cut-list session.

SOURCE: 'Math Week 4'!A10:E10; 'Carpentry Schedule'!B37; steps 'Math Week 4'!A29:F29 through 'Math Week 4'!A35:F35; answers 'Math Week 4'!B37. Original deck slides 61, 62, 63.

DAY 10 / WEEK 4 / W04-L02

Fraction cut lists, centre lines and kerf

Monday, November 16, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL
Use multiplication and division of fractions to find repeated cuts, centres and offcuts including stated kerf.

READ
Textbook sections 4.7 pp.67–70; fraction worksheets pp.71–74

ASSIGNED PRACTICE
Exercise Book 4A Q16–17 (p.26); 4B Q1,4–7 (pp.27–28); 4C Q5 (p.30)

TOOL ACTIVITY
Shape Canvas: model repeated rectangular pieces in in units; add text labels for stock and kerf. Check paper answers with the Numeracy Hub Calculator.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect fractions in cut lists, centres and kerf to reading a carpentry drawing or preparing a cut list. State the objective.	Share a prior use of this skill; identify the quantity and unit. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask how many equal gaps lie between nine marked points. Review the difference between a piece and a saw cut.	Attempt the short retrieval task independently; explain the method before seeing answers. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model Exercise Book 4B Q1 including all three kerfs. Demonstrate reciprocal division using a centre-line or shim example.	Annotate a worked example; predict the next step and ask questions. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Solve Exercise Book 4B Q4–5 together. Draw the equal spaces for Q6 before forming the equation.	Work in pairs; alternate calculator operator and checker. Show units and an estimated answer. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Solve Exercise Book 4A Q16–17, 4B Q6–7 and 4C Q5 as time permits. Explain why complete pieces round down; use only the kerf given in the question.	Solve on paper first; use the tool to check; correct one error with a written reason. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 4B Q5 and Q7; show centre line, complete pieces and offcut.	Solve without displayed answers; include working, units and the requested rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What did you learn? Where will you use it? What will you check next time?	Name the math and one other essential skill used; write the next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
4B Q5 = 7 13/16 in; Q7 = 15 spacers, 2 1/2 in offcut. Answer Key p.13. Answer Key pp.13–14

Next: Bridge fractional inches to decimals; retain exact fractions until the required rounding step.

SOURCE: 'Math Week 4'!A11:E11; 'Carpentry Schedule'!B39; steps 'Math Week 4'!A46:F46 through 'Math Week 4'!A52:F52; answers 'Math Week 4'!B54. Original deck slides 64, 65, 66.

DAY 11 / WEEK 4 / W04-L03

Decimals: place value and operations

Tuesday, November 17, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Read metric decimal sizes and perform decimal operations with an estimated check.	**READ** Textbook sections 5.1–5.5 pp.76–81
ASSIGNED PRACTICE Exercise Book 5A Q1–11 (pp.32–33); 5B Q1,3 (p.34)	**TOOL ACTIVITY** Numeracy Hub: Measuring Tools: metric rule readings. Shape Canvas: rectangle in mm; enter decimal dimensions and read the labels.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect decimal place value and arithmetic to reading a carpentry drawing or preparing a cut list. State the objective.	Share a prior use of this skill; identify the quantity and unit. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Use Exercise Book 5A Q4–5 to compare decimals; ask why more digits do not always mean a larger value.	Attempt the short retrieval task independently; explain the method before seeing answers. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model aligned decimal points, multiplication and division; estimate the order of magnitude before entering keys.	Annotate a worked example; predict the next step and ask questions. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work Exercise Book 5A Q8–11 selected parts. Pair-check the position of each decimal point.	Work in pairs; alternate calculator operator and checker. Show units and an estimated answer. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 5A Q1–7 plus 5B Q1,3. Display one decimal-size rectangle in Shape Canvas and explain what each digit means.	Solve on paper first; use the tool to check; correct one error with a written reason. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 5A Q8 and Q10(a); include an estimate for each answer.	Solve without displayed answers; include working, units and the requested rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What did you learn? Where will you use it? What will you check next time?	Name the math and one other essential skill used; write the next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
5A Q8 = 73.83; Q10(a) = 0.24. 5B Q1 = 142.75 mm; Q3 = 7 shims. Answer Key p.16. Answer Key pp.15–16

Next: Use decimal place-value errors to choose tomorrow’s conversion warm-up.

SOURCE: 'Math Week 4'!A12:E12; 'Carpentry Schedule'!C37; steps 'Math Week 4'!A64:F64 through 'Math Week 4'!A70:F70; answers 'Math Week 4'!B72. Original deck slides 67, 68, 69.

DAY 11 / WEEK 4 / W04-L04

Decimals, tape rounding and costs

Tuesday, November 17, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Convert fractions and decimals, round an inch size to the requested graduation, and calculate a simple cost.	**READ** Textbook sections 5.6–5.7 pp.82–87
ASSIGNED PRACTICE Exercise Book 5A Q12–15 (p.33); 5B Q2,4,7 (p.34)	**TOOL ACTIVITY** Numeracy Hub Calculator: fraction/decimal conversion. Shape Canvas: compare the same in dimension entered as a fraction and as a decimal.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect fractions and decimals, tape rounding and costs to reading a carpentry drawing or preparing a cut list. State the objective.	Share a prior use of this skill; identify the quantity and unit. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask for the decimal equivalents of 1/2 and 1/4. Check that a money answer and a tape answer use different rounding.	Attempt the short retrieval task independently; explain the method before seeing answers. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model numerator ÷ denominator, rounding decimal inches to sixteenths and cost = quantity × unit price. Preserve full precision until the final step.	Annotate a worked example; predict the next step and ask questions. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Work Exercise Book 5A Q12–14 and 5B Q2 in pairs. Show why each rounded answer meets the requested unit.	Work in pairs; alternate calculator operator and checker. Show units and an estimated answer. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete Exercise Book 5A Q15, 5B Q4,7. Compare fraction and decimal entries in Shape Canvas; write a cost calculation with a reasonableness check.	Solve on paper first; use the tool to check; correct one error with a written reason. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 5A Q13 and 5B Q7; give simplest fractions and the tape reading.	Solve without displayed answers; include working, units and the requested rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What did you learn? Where will you use it? What will you check next time?	Name the math and one other essential skill used; write the next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
5A Q13 = 7/8 and 2/25. 5B Q7 = 3 3/8 in. Answer Key p.16. Answer Key pp.15–17

Next: Move from decimals to percentages, using the same estimate-before-calculating routine.

SOURCE: 'Math Week 4'!A13:E13; 'Carpentry Schedule'!C39; steps 'Math Week 4'!A81:F81 through 'Math Week 4'!A87:F87; answers 'Math Week 4'!B89. Original deck slides 70, 71, 72.

DAY 12 / WEEK 4 / W04-L05

Percent: part of a whole

Wednesday, November 18, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Convert percentages, decimals and fractions; find a percentage of a quantity.	**READ** Textbook sections 6.1–6.3 pp.92–95; calculator percent p.35
ASSIGNED PRACTICE Exercise Book 6A Q1–10 (p.39); 6C Q1–2 (p.43)	**TOOL ACTIVITY** Numeracy Hub Calculator: choose the matching calculator model for percent entry. Shape Canvas: rectangle with width equal to a stated percentage of length.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect percent as part of a whole to reading a carpentry drawing or preparing a cut list. State the objective.	Share a prior use of this skill; identify the quantity and unit. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Retrieve 0.5 = 1/2 and ask for the matching percent. Use Exercise Book 6A Q1 and Q3.	Attempt the short retrieval task independently; explain the method before seeing answers. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model percent ÷ 100, then multiply by the whole. Compare this with the book's calculator-specific percent keys.	Annotate a worked example; predict the next step and ask questions. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work Exercise Book 6A Q5–8 and 6C Q2. Learners label the part, whole and rate.	Work in pairs; alternate calculator operator and checker. Show units and an estimated answer. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 6A Q2,4,9–10 and 6C Q1. Create the 6C Q2 rectangle in Shape Canvas after calculating its missing width.	Solve on paper first; use the tool to check; correct one error with a written reason. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 6A Q8–9 with a labelled part/whole calculation.	Solve without displayed answers; include working, units and the requested rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What did you learn? Where will you use it? What will you check next time?	Name the math and one other essential skill used; write the next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
6A Q8 = 273; Q9 = 7.5%. 6C Q2 = 560 mm. Answer Key p.19. Answer Key pp.18–19

Next: Apply percentage reasoning to waste allowances and whole-unit orders.

SOURCE: 'Math Week 4'!A14:E14; 'Carpentry Schedule'!D37; steps 'Math Week 4'!A99:F99 through 'Math Week 4'!A105:F105; answers 'Math Week 4'!B107. Original deck slides 73, 74, 75.

DAY 12 / WEEK 4 / W04-L06

Waste allowance and purchase quantities

Wednesday, November 18, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Apply an allowance or discount once, then round an order to whole purchase units.	**READ** Textbook sections 6.4 pp.96–97; review sections 5.7 pp.86–87
ASSIGNED PRACTICE Exercise Book 6A Q11–13 (pp.39–40); 6B Q1–3,5 (p.41)	**TOOL ACTIVITY** Numeracy Hub Calculator: compare percent-key and decimal-multiplier methods. Shape Canvas: label a rectangle as net material versus order quantity.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect waste allowance, discounts and purchase quantities to reading a carpentry drawing or preparing a cut list. State the objective.	Share a prior use of this skill; identify the quantity and unit. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask whether a 15% allowance means ordering 15% or 115% of the original quantity.	Attempt the short retrieval task independently; explain the method before seeing answers. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model Exercise Book 6B Q2, keep the unrounded allowance quantity, then round up to full sheets. Contrast increase with discount.	Annotate a worked example; predict the next step and ask questions. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Work Exercise Book 6A Q11–13 and 6B Q3; learners identify the original base before calculating.	Work in pairs; alternate calculator operator and checker. Show units and an estimated answer. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Solve Exercise Book 6B Q1,5 and rework Q2 with a written order explanation. Label all practice allowances as problem data, not a standard job allowance.	Solve on paper first; use the tool to check; correct one error with a written reason. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 6B Q2 and Q3, showing the unrounded order and discount calculation.	Solve without displayed answers; include working, units and the requested rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What did you learn? Where will you use it? What will you check next time?	Name the math and one other essential skill used; write the next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
6B Q2 = 20.7, rounded up to 21 sheets; Q3 = $76.12 each, $456.72 for six. Answer Key p.19. Answer Key pp.18–19

Next: Use the difference between a fraction of the total and a ratio of parts as the next bridge.

SOURCE: 'Math Week 4'!A15:E15; 'Carpentry Schedule'!D39; steps 'Math Week 4'!A116:F116 through 'Math Week 4'!A122:F122; answers 'Math Week 4'!B124. Original deck slides 76, 77, 78.

DAY 13 / WEEK 4 / W04-L07

Ratios, rates and proportions

Thursday, November 19, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Simplify ratios in common units and use proportions to scale a material quantity.	**READ** Textbook sections 6.5–6.7 pp.98–101
ASSIGNED PRACTICE Exercise Book 6A Q14–18 (p.40); 6B Q4,6 (p.41), Q7 (p.42)	**TOOL ACTIVITY** Shape Canvas: compare rectangles with proportional dimensions. Numeracy Hub Calculator: check a rate or proportion after writing units.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect ratios, rates and proportions to reading a carpentry drawing or preparing a cut list. State the objective.	Share a prior use of this skill; identify the quantity and unit. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Use Exercise Book 6A Q14. Ask why millimetres and metres must match before comparing quantities.	Attempt the short retrieval task independently; explain the method before seeing answers. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model common units, total parts and the unit rate. Demonstrate Exercise Book 6A Q16 with a bar sketch.	Annotate a worked example; predict the next step and ask questions. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work Exercise Book 6A Q15,17–18 and 6B Q6 in pairs. Learners label numerator and denominator units.	Work in pairs; alternate calculator operator and checker. Show units and an estimated answer. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 6B Q4 and Q7. Draw proportional parts on Shape Canvas; treat the book's epoxy mix only as a math example, not a real mixing instruction.	Solve on paper first; use the tool to check; correct one error with a written reason. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 6A Q18 and Exercise Book 6B Q6; show the proportion or unit-rate calculation.	Solve without displayed answers; include working, units and the requested rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What did you learn? Where will you use it? What will you check next time?	Name the math and one other essential skill used; write the next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
6A Q18: x = 12. 6B Q6 = 24.5 m. Answer Key p.19. Answer Key pp.18–19

Next: Apply the same proportion to scale drawings and dimensions.

SOURCE: 'Math Week 4'!A16:E16; 'Carpentry Schedule'!E37; steps 'Math Week 4'!A134:F134 through 'Math Week 4'!A140:F140; answers 'Math Week 4'!B142. Original deck slides 79, 80, 81.

DAY 13 / WEEK 4 / W04-L08

Scale drawings and weekly check

Thursday, November 19, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL
Translate drawing lengths to real lengths and explain a multi-step calculation from a dimensioned sketch.

READ
Textbook sections 6.8 pp.102–103; review Chapter 4–6

ASSIGNED PRACTICE
Exercise Book 6A Q19–20 (p.40); 6B Q8 (p.42); 6C Q5,7–8 (p.44)

TOOL ACTIVITY
Shape Canvas: draw a dimensioned rectangle and change one dimension proportionally. Numeracy Hub: Exam builder: optional Easy review of taught topics only.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect scale drawings and number-skills checkpoint to reading a carpentry drawing or preparing a cut list. State the objective.	Share a prior use of this skill; identify the quantity and unit. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask what 1:40 means. Compare a drawing length and a real length before calculating.	Attempt the short retrieval task independently; explain the method before seeing answers. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model Exercise Book 6A Q19 and contrast enlargement with reduction. Use written dimensions rather than measuring a screen image.	Annotate a worked example; predict the next step and ask questions. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Work Exercise Book 6A Q20 and 6B Q8 with a partner. Explain where inches, feet and the scale factor enter.	Work in pairs; alternate calculator operator and checker. Show units and an estimated answer. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete Exercise Book 6C Q5,7–8. Use a four-question paper checkpoint from the week; optional Numeracy Hub review only after core work.	Solve on paper first; use the tool to check; correct one error with a written reason. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 6A Q19–20 independently, with units and a sketch showing scale direction.	Solve without displayed answers; include working, units and the requested rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What did you learn? Where will you use it? What will you check next time?	Name the math and one other essential skill used; write the next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
6A Q19 = 3,400 mm; Q20 = 42 mm. 6B Q8 = 43 ft. Answer Key p.19. Answer Key pp.13–19

Next: Group learners by errors in fractions, decimals or ratio before Week 5 conversions.

SOURCE: 'Math Week 4'!A17:E17; 'Carpentry Schedule'!E39; steps 'Math Week 4'!A151:F151 through 'Math Week 4'!A157:F157; answers 'Math Week 4'!B159. Original deck slides 82, 83, 84.

DAY 14 / WEEK 5 / W05-L01

Measurement systems and readable dimensions

Tuesday, November 24, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Read metric and imperial lengths and convert within one system before using mixed-unit drawings.	**READ** Textbook sections 7.1–7.2 pp.108–110; sections 4.2 pp.57–58
ASSIGNED PRACTICE Exercise Book 7A Q1–10 (p.45); 5A Q3 (p.32)	**TOOL ACTIVITY** Numeracy Hub: Measuring Tools: rule and tape reading; Numeracy Hub: Unit Conversions. Shape Canvas: read a rectangle in mm and in without treating screen size as a ruler.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect measurement systems and readable dimensions to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Use Exercise Book 7A Q1,7; ask which quantities are lengths and which are capacities.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model m–cm–mm and feet–inches conversions. Distinguish a labelled drawing size from a screen measurement.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work Exercise Book 7A Q2–3,8–10. Pair learners to read and say the units aloud.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete remaining 7A Q1–10 and 5A Q3. Measure two classroom objects with rule/tape; record units and compare readings with a partner.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 7A Q8–9; show conversion of mixed feet/inches and a reverse check.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
7A Q8 = 115 3/4 in; Q9 = 7 ft 10 in. Answer Key p.21. Answer Key pp.16,20–21

Next: Use unit-prefix or feet/inches errors to group learners for metric–imperial conversion.

SOURCE: 'Math Week 5'!A10:E10; 'Carpentry Schedule'!C50; steps 'Math Week 5'!A28:F28 through 'Math Week 5'!A34:F34; answers 'Math Week 5'!B36. Original deck slides 87, 88, 89.

DAY 14 / WEEK 5 / W05-L02

Exact conversion factors and mixed-unit practice

Tuesday, November 24, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL
Convert inch and metric dimensions using the book factor, rounding only to the requested final precision.

READ
Textbook sections 7.3 pp.111–112; conversion factors pp.220–221

ASSIGNED PRACTICE
Exercise Book 7A Q11–16 (pp.45–46); 7B Q1–2 (p.47); 7C Q1–3 (p.49)

TOOL ACTIVITY
Numeracy Hub: Unit Conversions: length conversion practice. Shape Canvas: build the 7C Q1 rectangle and switch displayed units to check.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect exact conversion factors and mixed-unit practice to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask whether converting inches to millimetres should enlarge or shrink the number. Retrieve 1 in = 25.4 mm.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model factor-label conversion and the difference between exact factors and rounded results. Work one conversion to a tape graduation.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Solve Exercise Book 7A Q11–14 together; check one by converting back before rounding.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete Exercise Book 7B Q1–2 and 7C Q1–3. Show the factor and units on paper; use the Numeracy Hub and Shape Canvas only after predicting the result.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 7A Q11 and Exercise Book 7B Q1; show the exact result before final tape rounding.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
7A Q11 = 15.875 mm. 7B Q1 = 7 ft 4 in to nearest 1/16 in. Answer Key p.21. Answer Key pp.20–21

Next: Carry consistent units into formula substitution; do not substitute mixed units.

SOURCE: 'Math Week 5'!A11:E11; 'Carpentry Schedule'!C52; steps 'Math Week 5'!A45:F45 through 'Math Week 5'!A51:F51; answers 'Math Week 5'!B53. Original deck slides 90, 91, 92.

DAY 15 / WEEK 5 / W05-L03

Reading and substituting into formulas

Wednesday, November 25, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Name variables and substitute dimensions into a formula with correct brackets and units.	**READ** Textbook sections 8.1–8.2 pp.124–125; formula sheet p.219
ASSIGNED PRACTICE Exercise Book 8A Q1–8 (p.51); 8B Q12 (p.54)	**TOOL ACTIVITY** Numeracy Hub: Shape Studio: compare Letters and values labels with Calculations. Shape Canvas: rectangle; show sizes and formulas.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect reading and substituting into formulas to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask what l and w stand for in A = l × w. Check BEDMAS using a two-step expression.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model a given–find–formula–substitute–check routine using a rectangle. Explain that an area result alone does not prove that a part fits.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work Exercise Book 8A Q2–4 and Q7. Learners name each quantity before entering calculator keys.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 8A Q5–6,8 and 8B Q12. Use Shape Canvas dimensions to verify substituted values; treat formula applications as introductions, not full geometry mastery.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 8A Q3–4; label the result as area or perimeter and include units.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

8A Q3 = 9 m²; Q4 = 4,250 mm (verified against Exercise Book p.51 and Answer Key p.23). Answer Key pp.22–23

Next: Move from substitution to solving for a missing dimension; retain the same written routine.

SOURCE: 'Math Week 5'!A12:E12; 'Carpentry Schedule'!D50; steps 'Math Week 5'!A63:F63 through 'Math Week 5'!A69:F69; answers 'Math Week 5'!B71. Original deck slides 93, 94, 95.

DAY 15 / WEEK 5 / W05-L04

Rearranging formulas and checking backwards

Wednesday, November 25, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Rearrange one- and two-step formulas and validate a missing dimension by substitution.	**READ** Textbook sections 8.3–8.5 pp.126–130; sections 8.7 p.134
ASSIGNED PRACTICE Exercise Book 8A Q9–22 (pp.51–52), selected; 8B Q1,4 (p.53), Q15 (p.54)	**TOOL ACTIVITY** Shape Canvas: rectangle with a known area/perimeter and one dimension to find. Numeracy Hub Calculator: perform the substitution check.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect rearranging formulas and checking backwards to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Use Exercise Book 8A Q9,11. Ask which inverse operation preserves equality.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model balancing both sides, then derive l = P/2 − w. Contrast it with the incorrect l = P − 2w from Exercise Book 8B Q15.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Complete Exercise Book 8A Q15,18–19 and Exercise Book 8B Q1 as a group. Learners explain the inverse step.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Solve selected Exercise Book 8A Q12–14,16–17,20–22 and Exercise Book 8B Q4,15. Check every result in the original equation; use tools after the written rearrangement.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 8B Q4 and Q15; show the substitution check, not just the answer.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
8B Q4 = 1,950 mm. Q15: incorrect result 2,600 mm; correct l = 1,300 mm. Rechecking gives P = 4,000 mm.
Exercise Book pp.53–54; Answer Key p.23. Answer Key pp.22–23

Next: Use squares and square roots only after one- and two-step rearrangements are secure.

SOURCE: 'Math Week 5'!A13:E13; 'Carpentry Schedule'!D52; steps 'Math Week 5'!A80:F80 through 'Math Week 5'!A86:F86; answers 'Math Week 5'!B88. Original deck slides 96, 97, 98.

DAY 16 / WEEK 5 / W05-L05

Hidden dimensions: square roots and formula checks

Thursday, November 26, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Find a missing dimension from a known area and check the answer in the original formula.	**READ** Textbook sections 8.6 pp.131–133; sections 8.7 p.134; calculator pp.31–33
ASSIGNED PRACTICE Exercise Book 8A Q23–24 (p.52); 8B Q6,13 (pp.53–54); 8C Q1–4 (p.55)	**TOOL ACTIVITY** Shape Canvas: square and rectangle; hide a dimension for a partner to calculate, then use Practice / Check all. Numeracy Hub Calculator: model-specific square-root entry.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect hidden dimensions: square roots and formula checks to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask how to undo a square, and why dividing by two is not the same as taking a square root.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model finding a square’s side from its area. Demonstrate the different square-root key order for the two calculator models.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Work Exercise Book 8A Q23 and Exercise Book 8C Q1–2. Learners check by multiplying the found dimensions.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete Exercise Book 8B Q6,13; attempt Exercise Book 8C Q3–4 with formula support if ready. Make a hidden-dimension Shape Canvas prompt for a partner.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 8C Q1–2 independently; substitute each answer back.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

8C Q1 = 60 cm; Q2 = 56 mm. Answer Key p.24. Answer Key pp.22–24

Next: Apply perimeter formulas to frames before extending to curved boundaries.

SOURCE: 'Math Week 5'!A14:E14; 'Carpentry Schedule'!E52; steps 'Math Week 5'!A98:F98 through 'Math Week 5'!A104:F104; answers 'Math Week 5'!B106. Original deck slides 99, 100, 101.

DAY 17 / WEEK 5 / W05-L06

Perimeter, frame lengths and material totals

Friday, November 27, 2026 • 9:00 AM–10:15 AM • 75 min • Math

GOAL Calculate a straight-sided perimeter and identify missing dimensions without counting internal lines.	**READ** Textbook sections 9.1 p.140; sections 9.6 pp.147–148
ASSIGNED PRACTICE Exercise Book 9A Q1–8 (p.57); 9B Q1 (p.59); 9C Q1–2 (p.61)	**TOOL ACTIVITY** Shape Canvas: rectangle and triangle; distinguish outside boundary from height lines. Numeracy Hub: Volume and Layout, then Module 2 Area and perimeter.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	Connect perimeter, frame lengths and material totals to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Ask learners to trace the outside of a sketch; contrast perimeter with area.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:25 AM **15 min**	Model a rectangle’s boundary and conversion of mixed feet/inches. Demonstrate why a dashed height is not an edge.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 9:25 AM to 9:40 AM **15 min**	Work Exercise Book 9A Q1,6–8 and Exercise Book 9C Q2. Learners mark every boundary segment used.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 9:40 AM to 10:00 AM **20 min**	Complete Exercise Book 9A Q2–5, 9B Q1 and 9C Q1. Create a dimensioned frame on Shape Canvas; calculate by both addition and formula.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 10:00 AM to 10:10 AM **10 min**	Exercise Book 9A Q8 and 9B Q1; explain the units and show the boundary calculation.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
9A Q8 = 700 mm; 9B Q1 = 8 ft 6 in. Answer Key p.26. Answer Key pp.25–26

Next: Transfer boundary reasoning to circles; distinguish diameter from radius.

SOURCE: 'Math Week 5'!A15:E15; 'Carpentry Schedule'!F46; steps 'Math Week 5'!A116:F116 through 'Math Week 5'!A122:F122; answers 'Math Week 5'!B124. Original deck slides 102, 103, 104.

DAY 17 / WEEK 5 / W05-L07

Circumference, arcs and perimeter consolidation

Friday, November 27, 2026 • 10:30 AM–12:00 PM • 90 min • Math

GOAL Find circumference or an arc length and combine curved and straight boundary segments.	**READ** Textbook sections 9.2–9.6 pp.141–148
ASSIGNED PRACTICE Exercise Book 9A Q9–17 (p.58), selected; 9B Q2,8 (p.59); 9C Q3–5 (pp.61–62)	**TOOL ACTIVITY** Shape Canvas: circle, change radius and compare circumference. Numeracy Hub: Volume and Layout, then Area and perimeter; use Easy examples first.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	Connect circumference, arcs and perimeter consolidation to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Ask learners to label r and D on a circle and explain their relationship.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Model C = πD, then the fraction of a full circumference for an arc. Use the π key and round at the final step.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Work Exercise Book 9A Q11–13,15 together; sketch each circle or arc before calculating.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Solve Exercise Book 9B Q2,8 and 9C Q3–5. Use extra time to compare two methods and correct radius/diameter errors. Tool answers stay hidden until a paper attempt.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Exercise Book 9A Q11 and Q15; label diameter and identify the arc fraction.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
9A Q11 = 1,193.81 mm; Q15 = 314.16 mm. Answer Key p.26. Answer Key pp.25–26

Next: Next week distinguish perimeter from square-unit area before using material coverage calculations.

SOURCE: 'Math Week 5'!A16:E16; 'Carpentry Schedule'!F48; steps 'Math Week 5'!A133:F133 through 'Math Week 5'!A139:F139; answers 'Math Week 5'!B141. Original deck slides 105, 106, 107.

DAY 18 / WEEK 6 / W06-L01

Area and material coverage

Monday, November 30, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Calculate rectangle and triangle areas and distinguish linear units from square units.	**READ** Textbook sections 10.1–10.3 pp.154–157; sections 7.4 pp.113–115
ASSIGNED PRACTICE Exercise Book 10A Q1–8 (p.63); 10B Q1,4 (p.65)	**TOOL ACTIVITY** Shape Canvas: rectangle and right triangle with the same base and height. Numeracy Hub: Volume and Layout, then Module 2 Area and perimeter.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect area and material coverage to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask why 1 m² is not 1,000 mm²; retrieve a rectangle perimeter and name its different unit.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model area as a count of squares, then the triangle as half a rectangle. Show squared conversion factors.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work Exercise Book 10A Q2–4,7–8; learners label perpendicular height, not the sloping side.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 10A Q5–6 and 10B Q1,4. On Shape Canvas, compare the two shapes' areas. Keep the sheet count's no-waste assumption explicit.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 10B Q1; show floor area, one-sheet area and sheet quantity.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

10B Q1 = 25.92 m² and 9 sheets, assuming no waste as stated. Answer Key p.28. Answer Key pp.27–28

Next: Extend to composite surfaces and openings without double-counting.

SOURCE: 'Math Week 6'!A10:E10; 'Carpentry Schedule'!B60; steps 'Math Week 6'!A30:F30 through 'Math Week 6'!A36:F36; answers 'Math Week 6'!B38. Original deck slides 110, 111, 112.

DAY 18 / WEEK 6 / W06-L02

Composite areas, openings and surface coverage

Monday, November 30, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Break a composite shape into known parts and subtract openings before estimating coverage.	**READ** Textbook sections 10.4–10.7 pp.158–164
ASSIGNED PRACTICE Exercise Book 10A Q10–12 (p.64); 10B Q2 (p.65), Q11–12 (p.66); 10C Q4 (p.67)	**TOOL ACTIVITY** Shape Canvas: build a rectangle with an opening using two labelled shapes; compare parts. Numeracy Hub Shape Studio: use a solid/net as an optional surface-area preview.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect composite areas, openings and surface coverage to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Show a panel with a hole; ask which area is added and which is subtracted.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model Exercise Book 10B Q11 with outer and opening areas. Demonstrate a trapezoid and circle formula, keeping radius/diameter distinct.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Work Exercise Book 10A Q10–12 and Exercise Book 10C Q4. Partners annotate non-overlapping pieces.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete Exercise Book 10B Q2,11–12. Build a Shape Canvas sketch and label areas; use the net preview only if core subtraction and coverage are secure.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 10B Q11 and Q2; report net area and whole tins to buy.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
10B Q11 = 900,000 mm² = 0.9 m²; Q2 = 4.57 L, buy 5 tins. Answer Key p.28. Answer Key pp.27–28

Next: Compare square units with cubic units before the volume lesson.

SOURCE: 'Math Week 6'!A11:E11; 'Carpentry Schedule'!B62; steps 'Math Week 6'!A47:F47 through 'Math Week 6'!A53:F53; answers 'Math Week 6'!B55. Original deck slides 113, 114, 115.

DAY 19 / WEEK 6 / W06-L03

Volume of boxes and prisms

Tuesday, December 1, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Calculate prism volume using consistent units and convert a capacity to litres.	**READ** Textbook sections 11.1–11.3 pp.172–176; sections 7.4 pp.113–115
ASSIGNED PRACTICE Exercise Book 11A Q1–10 (p.69); 11B Q1,5 (p.71)	**TOOL ACTIVITY** Shape Canvas: rectangular prism; show its three dimensions. Numeracy Hub: Volume and Layout, then Module 1 Volume and capacity, box/slab examples.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect volume of boxes and prisms to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask learners to distinguish a length, surface area and volume; identify the third dimension on a box.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model V = l × w × h with all lengths in one unit. Explain cubic conversion and 1 m³ = 1,000 L using the book.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Work Exercise Book 11A Q2–7 and Q9. Learners estimate magnitude before calculating.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 11A Q8,10 and 11B Q1,5. Use a Shape Canvas prism to show how doubling one dimension changes volume.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 11A Q7 and Exercise Book 11B Q1; label volume/capacity and whole pails.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

11A Q7 = 0.07 m³. 11B Q1 = 180 L and 9 pails. Answer Key p.30. Answer Key pp.29–30

Next: Introduce cylindrical capacity using the same unit discipline; gallons must be identified by type.

SOURCE: 'Math Week 6'!A12:E12; 'Carpentry Schedule'!C60; steps 'Math Week 6'!A65:F65 through 'Math Week 6'!A71:F71; answers 'Math Week 6'!B73. Original deck slides 116, 117, 118.

DAY 19 / WEEK 6 / W06-L04

Cylinders, capacity and missing heights

Tuesday, December 1, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Find a cylinder's volume and use a known capacity to solve for a missing height or length.	**READ** Textbook sections 11.3–11.4 pp.175–178; sections 8.6 pp.131–133
ASSIGNED PRACTICE Exercise Book 11A Q11–13,19,21–22 (p.70); 11B Q2 (p.71); 11C Q1–2 (p.73)	**TOOL ACTIVITY** Shape Canvas: cylinder and box; hide a height after setting dimensions. Numeracy Hub: Volume and Layout, then Volume and capacity; Unit Conversions for L/US gal.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect cylinders, capacity and missing heights to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Ask why diameter must be halved before using $\pi r^2 h$; distinguish US and imperial gallons.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model cylinder volume and convert after calculating in one system. Rearrange $V = \pi r^2 h$ for h with bracketed denominator.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Work Exercise Book 11A Q13,19 and Exercise Book 11C Q1. Partners check by resubstitution.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete Exercise Book 11B Q2 and 11C Q2; compare 11A Q21. Use Shape Canvas to verify a hidden dimension. Cones/spheres are optional book extension, not required this session.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 11A Q13 and Exercise Book 11C Q1; include capacity units.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
11A Q13 = 42.41 L; 11C Q1 = 800 mm. Answer Key p.30. Answer Key pp.29–30

Next: Switch from dimensions to angles; retrieve squares and roots before right triangles.

SOURCE: 'Math Week 6'!A13:E13; 'Carpentry Schedule'!C62; steps 'Math Week 6'!A82:F82 through 'Math Week 6'!A88:F88; answers 'Math Week 6'!B90. Original deck slides 119, 120, 121.

DAY 20 / WEEK 6 / W06-L05

Angles, triangles and drawing interpretation

Wednesday, December 2, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Classify angles and use straight-line and triangle angle totals to find a missing angle.	**READ** Textbook sections 12.1–12.3 pp.188–190
ASSIGNED PRACTICE Exercise Book 12A Q1–9 (pp.75–76); 12B Q2 (p.77); 12C Q3–4 (p.79)	**TOOL ACTIVITY** Shape Canvas: triangle; change an angle and predict the other angles. Numeracy Hub: Angles and Trig: inspect diagrams only; advanced protractor topics are not required.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect angles, triangles and drawing interpretation to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask learners to identify 90°, a straight angle and a full turn; use Exercise Book 12A Q3.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model complementary and supplementary angles and a triangle’s 180° total. Distinguish the shown angle from its neighbour.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Solve Exercise Book 12A Q4–8 in pairs. Mark known angles and the relevant total on each sketch.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 12A Q1–2,9 and 12B Q2; then 12C Q3–4. Use Shape Canvas to vary one angle and explain the consequence.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 12A Q6–7 and Exercise Book 12B Q2.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

12A Q6 = 57°; Q7 = 52°. 12B Q2 = 38°, acute. Answer Key p.32. Answer Key pp.31–32

Next: Identify the hypotenuse and right angle before calculating unknown sides.

SOURCE: 'Math Week 6'!A14:E14; 'Carpentry Schedule'!D60; steps 'Math Week 6'!A100:F100 through 'Math Week 6'!A106:F106; answers 'Math Week 6'!B108. Original deck slides 122, 123, 124.

DAY 20 / WEEK 6 / W06-L06

Pythagorean theorem and brace lengths

Wednesday, December 2, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Find a missing side of a right triangle and verify the result with the squared-side relationship.	**READ** Textbook sections 12.4 pp.191–193; calculator roots pp.31–33
ASSIGNED PRACTICE Exercise Book 12A Q10–16 (p.76); 12B Q3 (p.77); 12C Q1–2 (p.79)	**TOOL ACTIVITY** Shape Canvas: right triangle; hide hypotenuse or a leg. Numeracy Hub Calculator: square each known side and bracket the sum before taking its root.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect pythagorean theorem and brace lengths to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Label the hypotenuse opposite the right angle. Retrieve a square and a square root.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model $c = \sqrt{(a^2+b^2)}$, then a missing leg using subtraction. Explain why the hypotenuse must be longest.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Solve Exercise Book 12A Q10–13; learners draw and label each triangle before entering keys.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete Exercise Book 12A Q15–16, 12B Q3 and 12C Q1–2. Check Shape Canvas answers only after writing the equation.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 12A Q10 and Q12 with the right-angle diagram and units.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

12A Q10 = 2,500 mm; Q12 = 1,500 mm. Answer Key p.32. Answer Key pp.31–32

Next: Use the same relationship for full-size 3–4–5 layout and rectangle diagonals.

SOURCE: 'Math Week 6'!A15:E15; 'Carpentry Schedule'!D62; steps 'Math Week 6'!A117:F117 through 'Math Week 6'!A123:F123; answers 'Math Week 6'!B125. Original deck slides 125, 126, 127.

DAY 21 / WEEK 6 / W06-L07

Checking square, diagonals and layout

Thursday, December 3, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Apply a scaled 3–4–5 triangle and compare diagonals to diagnose an out-of-square frame.	**READ** Textbook sections 12.5–12.6 pp.194–196
ASSIGNED PRACTICE Exercise Book 12A Q17–18 (p.76); 12B Q4–5,7 (pp.77–78)	**TOOL ACTIVITY** Shape Canvas: rectangle with diagonal; right triangle for the 3–4–5 check. Numeracy Hub: Measuring Tools: square checks; tape and chalk for a classroom floor layout.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect checking square, diagonals and layout to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask which three lengths make a scaled 3–4–5 triangle and why both diagonals matter.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model Exercise Book 12B Q4 and identify open versus closed corners. Demonstrate the expected diagonal from known side lengths.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	In pairs, mark a paper or clear-floor triangle using the book dimensions. Rotate measurer/checker roles; no cutting or power tools.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Solve Exercise Book 12B Q5,7 and 12A Q17–18. Compare theoretical diagonals to given readings; annotate the adjustment on a sketch.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 12B Q4 and Q5; state target lengths and the direction of correction.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

12B Q4: target 2 m; 1.998 m is closed. Q5: diagonals should be 3,499 mm; move together corners at the ends of the 3,505 mm diagonal. Answer Key p.32. Answer Key pp.31–32

Next: Move to trig only if right-angle, side labels and square-root checks are secure.

SOURCE: 'Math Week 6'!A16:E16; 'Carpentry Schedule'!E60; steps 'Math Week 6'!A135:F135 through 'Math Week 6'!A141:F141; answers 'Math Week 6'!B143. Original deck slides 128, 129, 130.

DAY 21 / WEEK 6 / W06-L08

SOH CAH TOA and missing sides

Thursday, December 3, 2026 • 2:15 PM–3:30 PM • 75 min • Math

GOAL Name sides relative to a marked angle and select sine, cosine or tangent to find a missing side.	**READ** Textbook sections 13.1–13.3 pp.202–206; sections 2.10 pp.37–38
ASSIGNED PRACTICE Exercise Book 13A Q1–8 (pp.81–82); 13C Q1–2 (p.85)	**TOOL ACTIVITY** Numeracy Hub: Angles and Trig, then Module 3 Right-triangle trigonometry. Shape Canvas: right triangle; show an angle and hide a side. Set calculator to DEG.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	Connect soh cah toa and missing sides to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Check hypotenuse identification; compare opposite and adjacent when the marked angle changes.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Model SOH CAH TOA, ratio selection and rearrangement. Demonstrate the selected calculator’s DEG setting and trig key order.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Work Exercise Book 13A Q1–5; learners say the two relevant sides before choosing a ratio.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Complete Exercise Book 13A Q6–8 and 13C Q1–2 as ready. Use one Easy Numeracy Hub task and compare with the drawn triangle.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Exercise Book 13A Q4 and Q6; label the sides and chosen ratio.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

13A Q4 = 344.45 mm; Q6 = 400.71 mm. Answer Key p.34. Answer Key pp.33–35

Next: Introduce inverse trig for angles; retain a foundation pathway for learners needing more right-triangle practice.

SOURCE: 'Math Week 6'!A17:E17; 'Carpentry Schedule'!E62; steps 'Math Week 6'!A152:F152 through 'Math Week 6'!A158:F158; answers 'Math Week 6'!B160. Original deck slides 131, 132, 133.

DAY 22 / WEEK 6 / W06-L09

Angles, grades and carpentry slope applications

Friday, December 4, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Find an angle from two sides and distinguish percentage grade from an angle in degrees.	**READ** Textbook sections 13.4–13.5 pp.207–209; sections 13.7 pp.213–214 (extension)
ASSIGNED PRACTICE Exercise Book 13A Q10–15 (p.82); 13B Q7 (p.83), Q12 (p.84)	**TOOL ACTIVITY** Numeracy Hub: Angles and Trig, then Right-triangle trigonometry: ramp/brace practice. Shape Canvas: right triangle with rise/run; use DEG.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	Connect angles, grades and carpentry slope applications to a dimensioned carpentry drawing. State the objective.	Describe a prior use of the skill; identify the given and unknown quantities. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask whether a 2% slope is the same as 2°. Retrieve the opposite/adjacent ratio.	Attempt the retrieval task independently; explain the method before checking. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Model inverse tangent, percentage grade = rise/run × 100, and the book ramp example. These are classroom calculations, not construction-code guidance.	Annotate the example and predict the next step; ask about unclear units or symbols. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Solve Exercise Book 13A Q10,14–15. Learners label degree answers differently from percentages.	Work in pairs, alternating solver and checker. Write a diagram, formula, units and estimate. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Complete Exercise Book 13A Q11–13 and 13B Q7; use Q12 as carpentry/truss extension. Show a Shape Canvas triangle and check the result with the Numeracy Hub.	Solve on paper first; check with tools; correct one error and explain the change. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Exercise Book 13A Q10 and Q14; give the grade and angle separately.	Solve without displayed answers; include working, units and final rounding. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask: What changed in your understanding? Where will you use it? What should you check next time?	Name the math and one other essential skill used; record a next practice step. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

13A Q10 = 23.63°. Q14 = 2% grade and 1.15°. Answer Key p.34. Answer Key pp.33–35

Next: Use Week 7 for applied drawings and reteaching rather than adding advanced pipe-trade content.

SOURCE: 'Math Week 6'!A18:E18; 'Carpentry Schedule'!F60; steps 'Math Week 6'!A170:F170 through 'Math Week 6'!A176:F176; answers 'Math Week 6'!B178. Original deck slides 134, 135, 136.

DAY 23 / WEEK 7 / W07-L01

Carpentry drawing: floor layout and cut list

Monday, December 7, 2026 • 12:45 PM–2:00 PM • 75 min • Math

GOAL Extract dimensions from a drawing, calculate a perimeter and offcut, and explain assumptions in a cut list.	**READ** Textbook Chapter 3 pp.44–51; Chapter 9 p.140; Chapter 10 pp.154–157
ASSIGNED PRACTICE Exercise Book 10B Q1 (p.65); 3C Q3 (p.23); 12B Q5 (p.78)	**TOOL ACTIVITY** Shape Canvas: set m units; draw the 7.2 m × 3.6 m floor rectangle from Exercise Book 10B Q1. Add a Text cut-list note. Numeracy Hub Calculator for numerical checks.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 12:45 PM to 12:50 PM **5 min**	State the objective and connect this block to the previous work. Confirm the role of paper working and tool checking.	Identify one target skill and the checking habit to use today. **Materials/check:** Notebook; calculator
2 Recall 12:50 PM to 12:55 PM **5 min**	Ask which dimensions are needed for perimeter, area and diagonal; retrieve one kerf calculation.	Review previous feedback and attempt the retrieval prompt without displayed solutions. **Materials/check:** Identify support needs
3 Teach 12:55 PM to 1:10 PM **15 min**	Introduce an instructor-designed carpentry adaptation of Exercise Book 10B Q1: same dimensions, using plywood rather than checker plate. Keep no-waste and rectangular-layout assumptions explicit.	Annotate the example or response expectations; ask about unclear steps. **Materials/check:** Textbook; worked example
4 Together 1:10 PM to 1:25 PM **15 min**	Partners annotate the floor rectangle and a separate 6,000 mm stock sketch from Exercise Book 3C Q3. Decide which information belongs to each calculation.	Explain the method and check directions; work with a partner only where permitted. **Materials/check:** Exercise Book; tool above
5 Practise 1:25 PM to 1:45 PM **20 min**	Draw and label the floor in Shape Canvas. Calculate perimeter, floor area and diagonal; solve Exercise Book 3C Q3 without changing its four cuts or 3 mm kerf. Record units and assumptions; do not mix the two problem contexts.	Keep numbered written solutions and units. Use tools only under the conditions stated for this block. **Materials/check:** Paper first; tool second
6 Check 1:45 PM to 1:55 PM **10 min**	Submit the labelled floor plan, perimeter calculation and stock offcut equation.	Submit work and demonstrate the checking strategy; identify a remaining difficulty. **Materials/check:** Teacher answers below
7 Wrap up 1:55 PM to 2:00 PM **5 min**	Ask what improved, what needs another attempt and which resource will support the next step.	Name the math and another essential skill used; record a concrete follow-up action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
Instructor adaptation: perimeter 21.6 m; area 25.92 m²; diagonal √(7.2²+3.6²) ≈ 8.05 m. Exercise Book 3C Q3 offcut = 1,188 mm (Answer Key p.10). Floor area: Answer Key p.28. Answer Key pp.10,28,32

Next: Bring the saved sketch and written assumptions into the material-order calculation session.

SOURCE: 'Math Week 7'!A10:E10; 'Carpentry Schedule'!B70; steps 'Math Week 7'!A25:F25 through 'Math Week 7'!A31:F31; answers 'Math Week 7'!B33. Original deck slides 139, 140, 141.

DAY 23 / WEEK 7 / W07-L02

Materials practice: sheeting and allowance

Monday, December 7, 2026 • 2:15 PM–3:30 PM • 75 min • Calculation Practice

GOAL
Use area and a stated classroom allowance to build a material quantity and distinguish an estimate from a cutting layout.

READ
Textbook sections 6.4 pp.96–97; Chapter 10 pp.154–164

ASSIGNED PRACTICE
Exercise Book 10B Q1–2 (p.65); 6B Q2 (p.41)

TOOL ACTIVITY
Shape Canvas: use the floor sketch and 1.2 m × 2.4 m sheet rectangles. Numeracy Hub Calculator: compare the no-waste sheet count with the allowance calculation.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 2:15 PM to 2:20 PM **5 min**	State the objective and connect this block to the previous work. Confirm the role of paper working and tool checking.	Identify one target skill and the checking habit to use today. **Materials/check:** Notebook; calculator
2 Recall 2:20 PM to 2:25 PM **5 min**	Retrieve the floor area and one-sheet area from the previous block. Ask why a fractional purchase quantity rounds up.	Review previous feedback and attempt the retrieval prompt without displayed solutions. **Materials/check:** Identify support needs
3 Teach 2:25 PM to 2:40 PM **15 min**	Work the no-waste floor quantity from Exercise Book 10B Q1. Add an explicitly instructor-designed 10% classroom allowance; this is a planning exercise, not a standard site allowance.	Annotate the example or response expectations; ask about unclear steps. **Materials/check:** Textbook; worked example
4 Together 2:40 PM to 2:55 PM **15 min**	Pairs lay out nine sheets as three 2.4 m lengths by three 1.2 m widths. Compare the verified no-waste layout with the separate allowance quantity.	Explain the method and check directions; work with a partner only where permitted. **Materials/check:** Exercise Book; tool above
5 Practise 2:55 PM to 3:15 PM **20 min**	Prepare a quantity note: floor area, sheet area, nine-sheet base and stated 10% allowance. Then solve Exercise Book 10B Q2 for coating tins. Check units, final rounding and assumptions; no prices are assumed.	Keep numbered written solutions and units. Use tools only under the conditions stated for this block. **Materials/check:** Paper first; tool second
6 Check 3:15 PM to 3:25 PM **10 min**	Explain the nine-sheet base, allowance order, and why an area estimate alone does not prove every cutting layout.	Submit work and demonstrate the checking strategy; identify a remaining difficulty. **Materials/check:** Teacher answers below
7 Wrap up 3:25 PM to 3:30 PM **5 min**	Ask what improved, what needs another attempt and which resource will support the next step.	Name the math and another essential skill used; record a concrete follow-up action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
Base: 25.92/2.88 = 9 sheets. Instructor 10% allowance: 9 × 1.10 = 9.9, rounded up to 10 sheets. 10B Q2: 4.57 L, so buy 5 tins (Answer Key p.28). Answer Key pp.19,28

Next: Use the drawing and quantity note to identify individual needs for Thursday’s targeted practice.

SOURCE: 'Math Week 7'!A11:E11; 'Carpentry Schedule'!B72; steps 'Math Week 7'!A42:F42 through 'Math Week 7'!A48:F48; answers 'Math Week 7'!B50. Original deck slides 142, 143, 144.

DAY 24 / WEEK 7 / W07-L03

Skill clinics: practise your priority topic

Thursday, December 10, 2026 • 9:00 AM–10:15 AM • 75 min • Math

GOAL
Repair a documented error and explain a corrected method independently.

READ
Textbook Chapter 4–5 pp.56–87; Chapter 7–8 pp.108–134; Chapter 12–13 pp.188–209, selected

ASSIGNED PRACTICE
Path A: 4A Q14–17 p.26; 5A Q12–15 p.33. B: 7A Q11–14 pp.45–46; 8C Q1–2 p.55. C: 12C Q1–2 p.79; 13A Q6,10 p.82.

TOOL ACTIVITY
Path A: Numeracy Hub Calculator and tape practice. B: Unit Conversions + Shape Canvas rectangle. C: Angles and Trig Module 3 + Shape Canvas right triangle.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	State the objective and connect this block to the previous work. Confirm the role of paper working and tool checking.	Identify one target skill and the checking habit to use today. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Use each learner's Week 6 exits and capstone work to choose one pathway. Do not assume all learners need trig extension.	Review previous feedback and attempt the retrieval prompt without displayed solutions. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:25 AM **15 min**	Model the most common error in each selected pathway with one source-book problem; explain how the check detects it.	Annotate the example or response expectations; ask about unclear steps. **Materials/check:** Textbook; worked example
4 Together 9:25 AM to 9:40 AM **15 min**	Partners work the first two selected pathway questions and explain the correction in their own words.	Explain the method and check directions; work with a partner only where permitted. **Materials/check:** Exercise Book; tool above
5 Practise 9:40 AM to 10:00 AM **20 min**	Complete four questions in the selected pathway, then one from another pathway if ready. Keep a before/after solution showing what changed; tool answers remain hidden until the attempt.	Keep numbered written solutions and units. Use tools only under the conditions stated for this block. **Materials/check:** Paper first; tool second
6 Check 10:00 AM to 10:10 AM **10 min**	Use Path A: 4A Q14(b); B: 7A Q11; or C: 13A Q10. Explain the error avoided.	Submit work and demonstrate the checking strategy; identify a remaining difficulty. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask what improved, what needs another attempt and which resource will support the next step.	Name the math and another essential skill used; record a concrete follow-up action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
A: 10 5/16 (Answer Key p.13). B: 15.875 mm (Answer Key p.21). C: 23.63° (Answer Key p.34). Evaluate the method as well as the number. Answer Key pp.13,16,21,24,32,34

Next: Build the following practice set from taught topics matching the actual errors, not every topic in the Numeracy Hub.

SOURCE: 'Math Week 7'!A12:E12; 'Carpentry Schedule'!E66; steps 'Math Week 7'!A60:F60 through 'Math Week 7'!A66:F66; answers 'Math Week 7'!B68. Original deck slides 145, 146, 147.

DAY 24 / WEEK 7 / W07-L04

Mixed-topic calculation practice

Thursday, December 10, 2026 • 10:30 AM–12:00 PM • 90 min • Calculation Practice

GOAL
Apply taught methods to fresh practice, retain working and use feedback to choose a revision priority.

READ
Textbook formula sheet p.219; conversion factors pp.220–221; relevant chapters as needed

ASSIGNED PRACTICE
Paper fallback: 3A Q8–9 p.19; 6B Q2 p.41; 7A Q11 p.45; 8C Q1–2 p.55; 10A Q5–6 p.63; 12C Q1–2 p.79.

TOOL ACTIVITY
Numeracy Hub: Exam builder: All off; enable only taught order, conversion, area/perimeter, volume or right-triangle topics. Easy; 10 questions; diagrams and calculator keys on; worked answers off. Save exam code before use.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	State the objective and connect this block to the previous work. Confirm the role of paper working and tool checking.	Identify one target skill and the checking habit to use today. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Ask learners to choose one personal error to watch for and identify their calculator model.	Review previous feedback and attempt the retrieval prompt without displayed solutions. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Demonstrate how to read a generated question, record its code and use the requested rounding. Preview the set and remove untaught or trade-specific material.	Annotate the example or response expectations; ask about unclear steps. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Work one separate demonstration question; learners state the formula and units before keys. Keep assessment/practice answers hidden.	Explain the method and check directions; work with a partner only where permitted. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Complete the previewed 10-question Numeracy Hub set, or the ten paper fallback questions. Keep written methods. Use Check my answers only after completion; reveal worked answers for correction and save the code/results manually.	Keep numbered written solutions and units. Use tools only under the conditions stated for this block. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Explain one corrected item and independently redo one missed type using new numbers from the same tool settings.	Submit work and demonstrate the checking strategy; identify a remaining difficulty. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask what improved, what needs another attempt and which resource will support the next step.	Name the math and another essential skill used; record a concrete follow-up action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
Use Numeracy Hub worked answers for the saved exam code; dynamic answers depend on generated values. Paper: 16;20;21 sheets;15.875 mm;60 cm;56 mm;294,000 mm²;2.56 m²;390 mm;1.5 m, in listed order. Answer Key pp.10,19,21,24,28,32

Next: Record two revision priorities for Week 8. This is formative practice, not an institutional pass/fail test.

SOURCE: 'Math Week 7'!A13:E13; 'Carpentry Schedule'!E68; steps 'Math Week 7'!A77:F77 through 'Math Week 7'!A83:F83; answers 'Math Week 7'!B85. Original deck slides 148, 149, 150.

DAY 25 / WEEK 8 / W08-L01

Review: numbers, units and formulas

Monday, December 14, 2026 • 9:00 AM–10:15 AM • 75 min • Math Review

GOAL
Retrieve core methods across the course and explain when each method is appropriate.

READ
Textbook Chapter 1–8, selected; formula sheet p.219; conversion factors pp.220–221

ASSIGNED PRACTICE
Stations: 1B Q3 p.8; 4A Q14(a),15(a) p.26; 5A Q12–13 p.33; 6A Q19 p.40; 7A Q11–12 p.45; 8C Q1–2 p.55.

TOOL ACTIVITY
Numeracy Hub Calculator for number checks; Unit Conversions for length practice. Shape Canvas: one rectangle with a missing dimension for the formulas station.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	State the objective and connect this block to the previous work. Confirm the role of paper working and tool checking.	Identify one target skill and the checking habit to use today. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Use learners' two priorities from Week 7. Ask each to identify a useful checking strategy.	Review previous feedback and attempt the retrieval prompt without displayed solutions. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:25 AM **15 min**	Model one representative error from the error logs: regrouping, wrong factor, wrong denominator or missing brackets.	Annotate the example or response expectations; ask about unclear steps. **Materials/check:** Textbook; worked example
4 Together 9:25 AM to 9:40 AM **15 min**	Pairs rotate through number, fraction/decimal, conversion and formula stations; explain one solution aloud at each stop.	Explain the method and check directions; work with a partner only where permitted. **Materials/check:** Exercise Book; tool above
5 Practise 9:40 AM to 10:00 AM **20 min**	Complete the listed station questions; start with the two highest-need topics. Keep written working and note whether a tool or prompt was required.	Keep numbered written solutions and units. Use tools only under the conditions stated for this block. **Materials/check:** Paper first; tool second
6 Check 10:00 AM to 10:10 AM **10 min**	Exercise Book 6A Q19, 7A Q11 and 8C Q2; identify the appropriate method for each.	Submit work and demonstrate the checking strategy; identify a remaining difficulty. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask what improved, what needs another attempt and which resource will support the next step.	Name the math and another essential skill used; record a concrete follow-up action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
6A Q19 = 3,400 mm; 7A Q11 = 15.875 mm; 8C Q2 = 56 mm. Answer Key pp.19,21,24. Answer Key pp.6,13,16,19,21,24

Next: Choose the geometry and application questions in the next block from the weakest demonstrated areas.

SOURCE: 'Math Week 8'!A10:E10; 'Carpentry Schedule'!B76; steps 'Math Week 8'!A25:F25 through 'Math Week 8'!A31:F31; answers 'Math Week 8'!B33. Original deck slides 152, 153, 154.

DAY 25 / WEEK 8 / W08-L02

Review: geometry and job problems

Monday, December 14, 2026 • 10:30 AM–12:00 PM • 90 min • Math Review

GOAL Select perimeter, area, volume or triangle methods from a drawing and report the correct unit.	**READ** Textbook Chapter 9–13 pp.140–214, selected; formula sheet p.219
ASSIGNED PRACTICE Exercise Book 9A Q1,8 p.57; 10B Q1,11 pp.65–66; 11A Q7,19 pp.69–70; 12B Q3 p.77; 13A Q6,14 p.82.	**TOOL ACTIVITY** Shape Canvas: compare rectangle, rectangular prism and right triangle. Numeracy Hub: Volume and Layout / Angles and Trig: one Easy practice task in a taught topic.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	State the objective and connect this block to the previous work. Confirm the role of paper working and tool checking.	Identify one target skill and the checking habit to use today. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Display three drawings and ask which result uses mm, mm² or mm³; retrieve DEG mode for trig.	Review previous feedback and attempt the retrieval prompt without displayed solutions. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Compare geometry formulas and the unknowns they solve. Show how to reject an unreasonable unit or magnitude.	Annotate the example or response expectations; ask about unclear steps. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Work Exercise Book 10B Q1 and 12B Q3 in pairs. Annotate all dimensions and explicitly include stated kerf.	Explain the method and check directions; work with a partner only where permitted. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Solve the remaining listed exercises, prioritizing documented needs. Finish with one fresh Numeracy Hub question; explain why that formula applies and keep its question/code for checking.	Keep numbered written solutions and units. Use tools only under the conditions stated for this block. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Exercise Book 10B Q11, 11A Q19 and 13A Q14, with diagrams and units.	Submit work and demonstrate the checking strategy; identify a remaining difficulty. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask what improved, what needs another attempt and which resource will support the next step.	Name the math and another essential skill used; record a concrete follow-up action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS

10B Q11 = 0.9 m²; 11A Q19 = 0.6 m; 13A Q14 = 2% grade and 1.15°. Answer Key pp.28,30,34. Answer Key pp.26,28,30,32,34

Next: Prepare Wednesday’s formative readiness set; allow the agreed formula sheet and calculator, not worked answers.

SOURCE: 'Math Week 8'!A11:E11; 'Carpentry Schedule'!B78; steps 'Math Week 8'!A42:F42 through 'Math Week 8'!A48:F48; answers 'Math Week 8'!B50. Original deck slides 155, 156, 157.

DAY 26 / WEEK 8 / W08-L03

Readiness check: 12 core questions

Wednesday, December 16, 2026 • 9:00 AM–10:15 AM • 75 min • Math Review

GOAL
Demonstrate independent calculation, units, working and checking across the core course skills.

READ
Textbook formula sheet p.219; conversion factors pp.220–221 permitted for this proposed formative check

ASSIGNED PRACTICE
Set in order: 4A Q14(a) p.26; 5A Q12 first value p.33; 6B Q2 p.41; 6A Q19 p.40; 7A Q11 p.45; 8C Q1 p.55; 9A Q1 p.57; 10B Q11 p.66; 11A Q7 p.69; 12A Q10 p.76; 13A Q6,14 p.82.

TOOL ACTIVITY
Use the book questions on paper with the chosen calculator. Numeracy Hub worked answers and Shape Canvas answer displays stay closed during the independent check.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 9:00 AM to 9:05 AM **5 min**	State the objective and connect this block to the previous work. Confirm the role of paper working and tool checking.	Identify one target skill and the checking habit to use today. **Materials/check:** Notebook; calculator
2 Recall 9:05 AM to 9:10 AM **5 min**	Confirm access needs, calculator model and permitted formula/conversion sheets. Explain this is not an official KPU entry exam or pass standard.	Review previous feedback and attempt the retrieval prompt without displayed solutions. **Materials/check:** Identify support needs
3 Teach 9:10 AM to 9:15 AM **5 min**	Show the required response format using a different worked example: diagram where useful, formula, units, calculation and final check.	Annotate the example or response expectations; ask about unclear steps. **Materials/check:** Textbook; worked example
4 Directions 9:15 AM to 9:20 AM **5 min**	Clarify directions and rounding without solving any scored item. Learners set up a numbered 1–12 response page.	Set up a numbered response page. Clarify directions only; do not work with a partner on test items. **Materials/check:** Paper; permitted reference sheets
5 Independent check 9:20 AM to 10:00 AM **40 min**	Complete the twelve listed questions independently in 40 minutes. Ask learners to attempt all core items; record help separately. If a skill was deferred, mark it not yet taught rather than assigning a false readiness judgement.	Keep numbered written solutions and units. Use tools only under the conditions stated for this block. **Materials/check:** No worked answers or tool hints
6 Collect & reflect 10:00 AM to 10:10 AM **10 min**	Collect work and have learners self-identify two uncertain items. Use the key below to tag concept, operation, calculator and units errors.	Submit work and demonstrate the checking strategy; identify a remaining difficulty. **Materials/check:** Teacher answers below
7 Wrap up 10:10 AM to 10:15 AM **5 min**	Ask what improved, what needs another attempt and which resource will support the next step.	Name the math and another essential skill used; record a concrete follow-up action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
In set order: 1 1/16; 0.875; 21 sheets; 3,400 mm; 15.875 mm; 60 cm; 7,100 mm; 900,000 mm² = 0.9 m²; 0.07 m³; 2,500 mm; 400.71 mm; 2% and 1.15°. Compare the listed Answer Key pages. Answer Key pp.13,16,19,21,24,26,28,30,32,34

Next: Use results for feedback and reteaching in the next scheduled block. No institutional pass mark is assumed.

SOURCE: 'Math Week 8'!A12:E12; 'Carpentry Schedule'!D76; steps 'Math Week 8'!A60:F60 through 'Math Week 8'!A66:F66; answers 'Math Week 8'!B68. Original deck slides 158, 159, 160.

DAY 26 / WEEK 8 / W08-L04

Corrections and a personal practice plan

Wednesday, December 16, 2026 • 10:30 AM–12:00 PM • 90 min • Math Review

GOAL
Correct a demonstrated error, solve a fresh problem of the same type and plan continued practice.

READ
Textbook relevant chapters from readiness errors; formula sheet p.219; glossary pp.222–225

ASSIGNED PRACTICE
Choose missed types from the readiness set. Fresh checks: 4A Q15(b) p.26; 7A Q12 p.45; 10A Q6 p.63; 12A Q12 p.76; 13A Q10 p.82.

TOOL ACTIVITY
Numeracy Hub: Exam builder: select only taught weak topics; Easy; 5 questions; worked answers off. Retain code and use worked answers after the attempt. Shape Canvas: rebuild one missed diagram.

Seven scheduled phases • Expanded slides share these minutes

PHASE / TIME	INSTRUCTOR PROMPT	LEARNERS / MATERIALS
1 Start 10:30 AM to 10:35 AM **5 min**	State the objective and connect this block to the previous work. Confirm the role of paper working and tool checking.	Identify one target skill and the checking habit to use today. **Materials/check:** Notebook; calculator
2 Recall 10:35 AM to 10:40 AM **5 min**	Return the readiness work privately; ask each learner to choose two errors to understand rather than only counting a score.	Review previous feedback and attempt the retrieval prompt without displayed solutions. **Materials/check:** Identify support needs
3 Teach 10:40 AM to 10:55 AM **15 min**	Reteach the two most common methods using different numbers. Model how to write a correction explaining why the first method failed.	Annotate the example or response expectations; ask about unclear steps. **Materials/check:** Textbook; worked example
4 Together 10:55 AM to 11:10 AM **15 min**	Learners pair-check one correction while the instructor supports the highest-need group. Require a diagram and units where relevant.	Explain the method and check directions; work with a partner only where permitted. **Materials/check:** Exercise Book; tool above
5 Practise 11:10 AM to 11:45 AM **35 min**	Correct missed items, then solve fresh checks matching the same skills. Create a five-question Numeracy Hub set if appropriate; keep its code. Write a personal plan naming two skills, book pages and tool modules for continued study.	Keep numbered written solutions and units. Use tools only under the conditions stated for this block. **Materials/check:** Paper first; tool second
6 Check 11:45 AM to 11:55 AM **10 min**	Independently complete one fresh question in each priority skill and explain the checking strategy.	Submit work and demonstrate the checking strategy; identify a remaining difficulty. **Materials/check:** Teacher answers below
7 Wrap up 11:55 AM to 12:00 PM **5 min**	Ask what improved, what needs another attempt and which resource will support the next step.	Name the math and another essential skill used; record a concrete follow-up action. **Materials/check:** Notebook / error log

TEACHER-ONLY ASSESSMENT / ANSWERS
Fresh checks in order: 4 3/8; 57.15 mm; 2.56 m²; 1,500 mm; 23.63°. Answer Key pp.13,21,28,32,34. Generated questions use their own saved-code worked answers. Answer Key pp.13,21,28,32,34

Next: Learner leaves with corrected work and a specific practice plan. Keep subsequent graduation and school-prep schedule activities unchanged.

SOURCE: 'Math Week 8'!A13:E13; 'Carpentry Schedule'!D78; steps 'Math Week 8'!A77:F77 through 'Math Week 8'!A83:F83; answers 'Math Week 8'!B85. Original deck slides 161, 162, 163.
