Cut-list practice and rounding

Day 02 • 2026-10-30 • 10:30 AM–12:00 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

01 READ & REASON

When checking a cut list in Numeracy Hub, what must the entered total include?

A. Only the longest piece

B. The stock length repeated once

C. Only one piece of each type

D. Every required piece with its quantity

Numeracy Hub

Choice (A–D) _____ **Working / reason** _____

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

Cut-list practice and rounding

Day 02 • 2026-10-30 • 15 questions

02 A stock count is 6.2 boards and only whole boards can be purchased. What should be ordered?

A. 6 boards
B. 6.2 boards
C. 7 boards
D. 5 boards

Choice (A–D)

Working / reason

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

03 What does rounding 2,463 mm to the nearest 10 mm give?

A. 2,460 mm
B. 2,470 mm
C. 2,400 mm
D. 2,500 mm

Choice (A–D)

Working / reason

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

04 Which operation checks that a cut plan fits the stock?

A. Compare total required length with stock length
B. Divide the longest piece by itself
C. Ignore quantities
D. Add the stock length twice

Choice (A–D)

Working / reason

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

Cut-list practice and rounding

Day 02 • 2026-10-30 • 15 questions

05 Rounding to the nearest unit and rounding up for purchase are…

A. Different decisions based on the task

B. Both ways to remove all units

C. Both always round down

D. Always the same operation

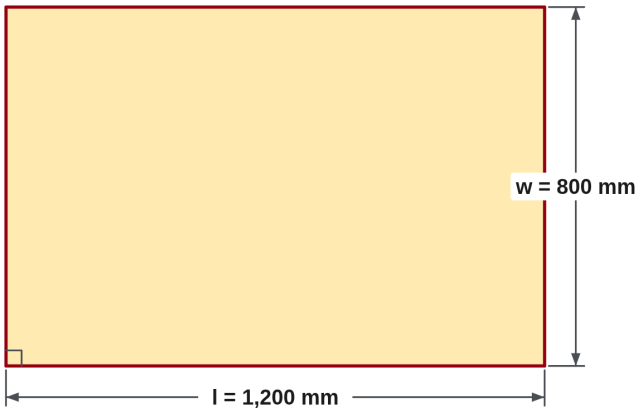

Choice (A–D)

Working / reason

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

06 CALCULATE

Use the Shape Canvas labels 1,200 mm and 800 mm. A cut list needs two pieces of each labelled length. Ignore kerf. Find the total.

Shape Canvas

Answer (mm)

Working / reason

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

Cut-list practice and rounding

Day 02 • 2026-10-30 • 15 questions

07 Three 640 mm pieces and two 850 mm pieces are required. Ignore kerf. Find the total length.

Answer (mm) | **Working / reason**

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

08 Round 7,286 mm to the nearest 100 mm.

Answer (mm) | **Working / reason**

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

09 A task needs 83 brackets sold in packs of 12. How many full packs must be purchased?

Answer (packs) | **Working / reason**

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

10 Round 12,643 to the nearest thousand.

Answer | **Working / reason**

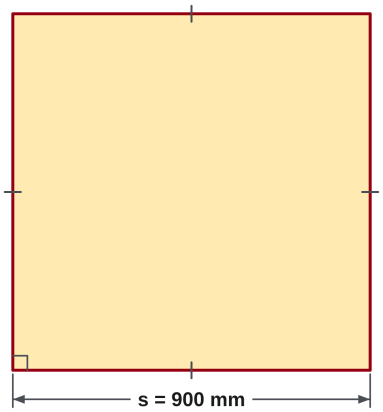

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

Cut-list practice and rounding

Day 02 • 2026-10-30 • 15 questions

11 APPLY & CHECK

The Shape Canvas square has a 900 mm side. A 5,000 mm stock length supplies five pieces of that length. Ignore kerf. What remains?

Shape Canvas

Answer (mm)

Working / reason

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

12 A cut plan needs 4,820 mm but the stock is 4,800 mm. Which conclusion is correct?

A. It fits with 20 mm spare

B. It fits after rounding to 5,000 mm

C. It is 20 mm too long before any cut loss

D. The difference is 200 mm

Choice (A–D)

Working / reason

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

Cut-list practice and rounding

Day 02 • 2026-10-30 • 15 questions

13 A crew needs 38 full pieces. Each stock length supplies 6 pieces. How many stock lengths are needed?

Answer (stock lengths) | **Working / reason**

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

14 Two 1,150 mm pieces and three 620 mm pieces are planned. Stock is 4,800 mm and total cut loss is 15 mm. Find the offcut.

Answer (mm) | **Working / reason**

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59

15 A 6,000 mm stock length loses 18 mm to the stated cuts. The pieces total 5,430 mm. Find the offcut.

Answer (mm) | **Working / reason**

Textbook sections 1.4–1.8 pp.14–23; sections 2.11 p.59
