BEDMAS in cut lists and frames

Day 03 • 2026-11-02 • 2:15 PM–3:30 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

01 READ & REASON

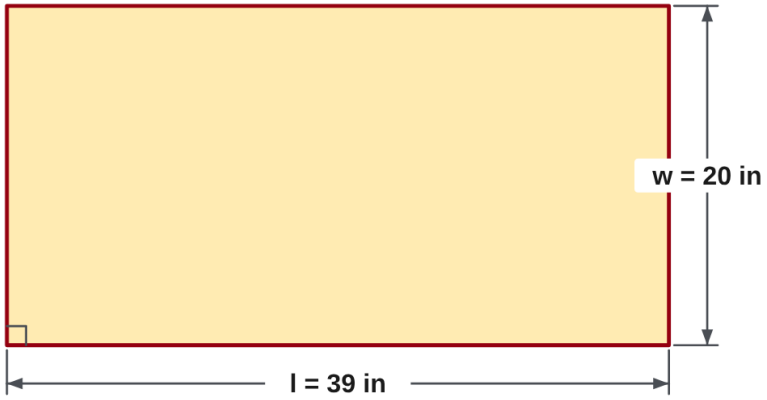

When using Numeracy Hub to check a frame expression, what should the written expression preserve?

A. Only the largest number

B. The quantities, brackets and operations from the plan

C. A different order that looks shorter

D. Only the final digit

Numeracy Hub

Choice (A–D) _____ **Working / reason** _____

Textbook Chapter 3 pp.68–75

Day 03 • 2026-11-02 • 15 questions

02 A plan needs two pieces of length L and two of width W. Which expression totals the pieces?

A. 2 × L + W

B. L × W

C. 2 × L + 2 × W

D. L + W ÷ 2

Choice (A–D)

Working / reason

Textbook Chapter 3 pp.68–75

03 Which expression means three identical sets, each containing a 600 mm and a 400 mm piece?

A. 3 × 600 × 400

B. 3 × (600 + 400)

C. 3 × 600 + 400

D. 600 + 3 + 400

Choice (A–D)

Working / reason

Textbook Chapter 3 pp.68–75

04 What does 4 × (350 + 250) count?

A. Four 350 mm pieces and one 250 mm piece

B. Four complete pairs of pieces

C. Only one pair

D. Four square areas

Choice (A–D)

Working / reason

Textbook Chapter 3 pp.68–75

Day 03 • 2026-11-02 • 15 questions

05 How should a stated total kerf allowance K enter an offcut expression?

A. Stock + piece total + K

B. K − stock − piece total

C. Stock − piece total + K

D. Stock − piece total − K

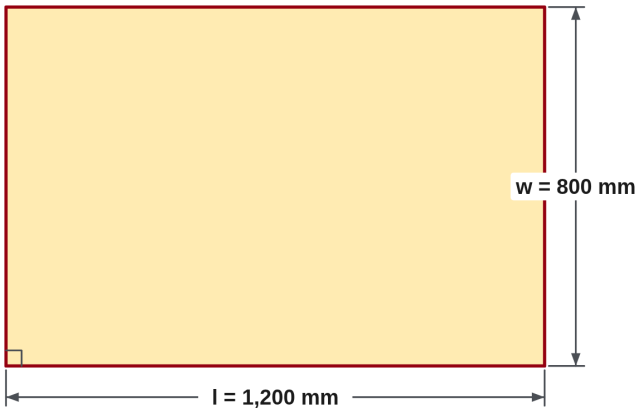

Choice (A–D)

Working / reason

Textbook Chapter 3 pp.68–75

06 CALCULATE

Using the Shape Canvas rectangle labels, total two 1,200 mm pieces and two 800 mm pieces. Ignore joints and kerf.

Shape Canvas

Answer (mm)

Working / reason

Textbook Chapter 3 pp.68–75

BEDMAS in cut lists and frames

Day 03 • 2026-11-02 • 15 questions

07 Three sets each require a 700 mm piece and a 450 mm piece. Find the total length.

Answer (mm)

Working / reason

Textbook Chapter 3 pp.68–75

08 A 4,800 mm stock length supplies five 760 mm pieces. Ignore kerf. Find the offcut.

Answer (mm)

Working / reason

Textbook Chapter 3 pp.68–75

09 A plan needs two 1,350 mm pieces and two 650 mm pieces. Find the total.

Answer (mm)

Working / reason

Textbook Chapter 3 pp.68–75

10 Four identical kits contain 12 large screws and 8 small screws each. Find the total screw count.

Answer (screws)

Working / reason

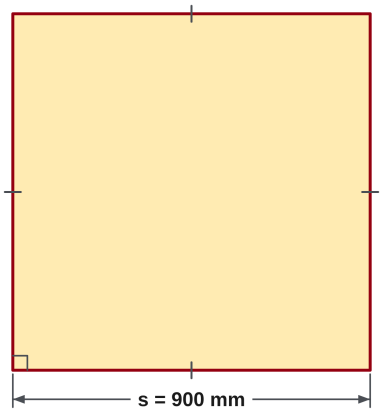

Textbook Chapter 3 pp.68–75

BEDMAS in cut lists and frames

Day 03 • 2026-11-02 • 15 questions

11 APPLY & CHECK

The Shape Canvas square shows 900 mm. A kit has three pieces of this length and two 300 mm pieces. Find the total.

Shape Canvas

Answer (mm)

Working / reason

Textbook Chapter 3 pp.68–75

12 A learner enters 4 × 600 + 400 for four complete 600 mm/400 mm pairs. What correction is needed?

A. Divide the result by 4

B. Use 4 + 600 + 400

C. Use (4 + 600) × 400

D. Use 4 × (600 + 400)

Choice (A–D)

Working / reason

Textbook Chapter 3 pp.68–75

BEDMAS in cut lists and frames

Day 03 • 2026-11-02 • 15 questions

13 A 6,000 mm stock length supplies two 1,250 mm pieces and three 900 mm pieces. Total cut loss is 20 mm. Find the offcut.

Answer (mm)

Working / reason

Textbook Chapter 3 pp.68–75

14 A box holds 200 brackets. Six kits each need 14 brackets. Find the remaining count.

Answer (brackets)

Working / reason

Textbook Chapter 3 pp.68–75

15 Five frames each need two 420 mm pieces and two 280 mm pieces. Find the total cut length.

Answer (mm)

Working / reason

Textbook Chapter 3 pp.68–75
