Repeated pieces and equal groups

Day 09 • 2026-11-10 • 12:45 PM–2:00 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

01 READ & REASON

Which entry checks four equal lengths in the Numeracy Hub calculator?

A. 4 ÷ one piece length

B. 4 × one piece length

C. 4 + one piece length

D. One piece length − 4

Numeracy Hub

Choice (A–D) _____ **Working / reason** _____

Textbook Chapter 4 pp.100–107

Repeated pieces and equal groups

Day 09 • 2026-11-10 • 15 questions

02 Which operation finds the midpoint of a 17 1/2 in board?

A. Multiply 17 1/2 by 2
B. Subtract 2 from 17 1/2
C. Divide 17 1/2 by 2
D. Add 2 to 17 1/2

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.100–107

03 What is the improper-fraction form of 2 3/4?

A. 9/4
B. 8/4
C. 5/4
D. 11/4

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.100–107

04 To divide by 3/4, which equivalent operation is correct?

A. Multiply by 3/4
B. Divide by 4/3
C. Add 4/3
D. Multiply by 4/3

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.100–107

Repeated pieces and equal groups

Day 09 • 2026-11-10 • 15 questions

05 A length of 12 in is divided into three equal sections. What does the answer describe?

A. The length of one section
B. The number of sections
C. The stock price
D. The width of a saw cut

Choice (A–D)

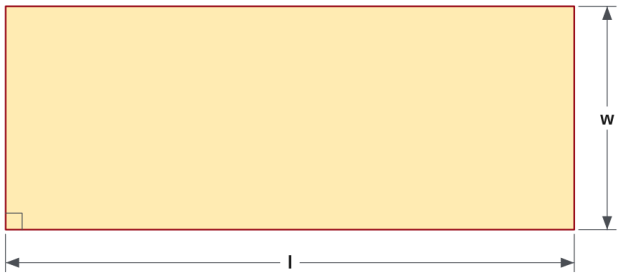

Working / reason

Textbook Chapter 4 pp.100–107

06 **CALCULATE**

The pictured short side is 7 1/4 in (7.25 in). Find the total length of three matching short pieces.

l = 18½ in w = 7¼ in

Shape Canvas

Answer (in)

Working / reason

Textbook Chapter 4 pp.100–107

Repeated pieces and equal groups

Day 09 • 2026-11-10 • 15 questions

07 The pictured long side is 18 1/2 in (18.5 in). Where is its midpoint measured from one end?

l = 18½ in **w = 7¼ in**

Shape Canvas

Answer (in)

Working / reason

Textbook Chapter 4 pp.100–107

08 Find the total length of four pieces each 2 3/8 in long.

Answer (in)

Working / reason

Textbook Chapter 4 pp.100–107

09 Split 15 3/4 in into three equal lengths. Find one length.

Answer (in)

Working / reason

Textbook Chapter 4 pp.100–107

Repeated pieces and equal groups

Day 09 • 2026-11-10 • 15 questions

10 Ignoring kerf, how many 3/4 in spacers fit exactly in 9 in?

Answer (spacers)

Working / reason

Textbook Chapter 4 pp.100–107

APPLY & CHECK

11 Eight equal blocking pieces are each 4 1/4 in long. Ignoring kerf, what total length is required?

Answer (in)

Working / reason

Textbook Chapter 4 pp.100–107

12 A 30 in stock strip is divided into pieces 2 1/2 in long, ignoring kerf. How many full pieces fit?

Answer (pieces)

Working / reason

Textbook Chapter 4 pp.100–107

Repeated pieces and equal groups

Day 09 • 2026-11-10 • 15 questions

13 A learner calculates 3 × 2 1/2 as 6 1/2. What went wrong?

A. The denominator should have been added

B. Multiplication cannot use mixed numbers

C. The 1/2 in fractional part was not multiplied by 3

D. The whole number was multiplied twice

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.100–107

14 Four equal gaps fill a total free space of 5 1/2 in. What is one gap?

Answer (in)

Working / reason

Textbook Chapter 4 pp.100–107

15 A centre mark is 6 7/8 in from either end of a strip. Find the full strip length.

Answer (in)

Working / reason

Textbook Chapter 4 pp.100–107
