Scale drawings and weekly check

Day 13 • 2026-11-19 • 2:15 PM–3:30 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

01 READ & REASON

Before using a Numeracy Hub calculator result for a scale drawing, what must be checked?

A. Whether the answer ends in zero

B. Only the number of displayed digits

C. The scale direction and consistent length units

D. Only the colour of the drawing

Numeracy Hub

Choice (A–D) _____ **Working / reason** _____

Textbook sections 6.8 pp.148–150; review Chapter 4–6

Scale drawings and weekly check

Day 13 • 2026-11-19 • 15 questions

02 At a scale of 1:50, what does 1 mm on the drawing represent?

A. 1/50 mm in reality
B. 50 mm in reality
C. 50 m in reality
D. 1 mm in reality

Choice (A–D)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

03 Which operation changes a drawing length into a real length at 1:20 scale?

A. Divide by 20
B. Add 20
C. Subtract 20
D. Multiply by 20

Choice (A–D)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

04 Which operation finds drawing length from a real length at 1:100 scale?

A. Divide by 10 only
B. Multiply by 100
C. Divide by 100
D. Add 100

Choice (A–D)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

Scale drawings and weekly check

Day 13 • 2026-11-19 • 15 questions

05 Which information should control a cut made from a drawing?

A. The apparent size of a screenshot

B. The stated dimension and units

C. The width of the page margin

D. A ruler measurement of a resized screen image

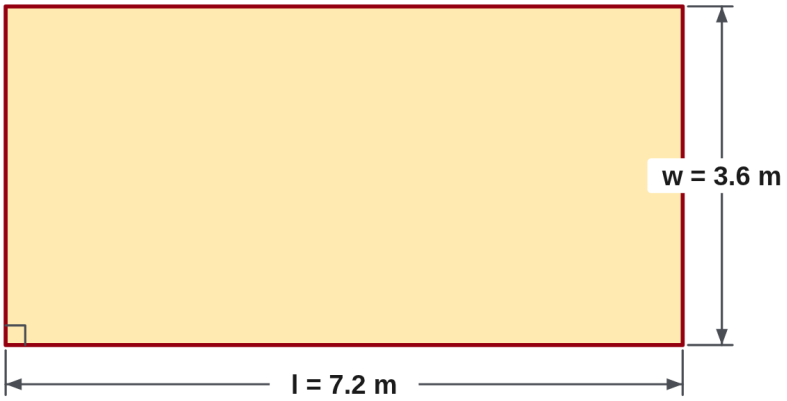

Choice (A–D)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

06 CALCULATE

The pictured real floor is 7.2 m long. At 1:50 scale, what is its drawing length in millimetres? Use 1 m = 1000 mm.

Shape Canvas

Answer (mm)

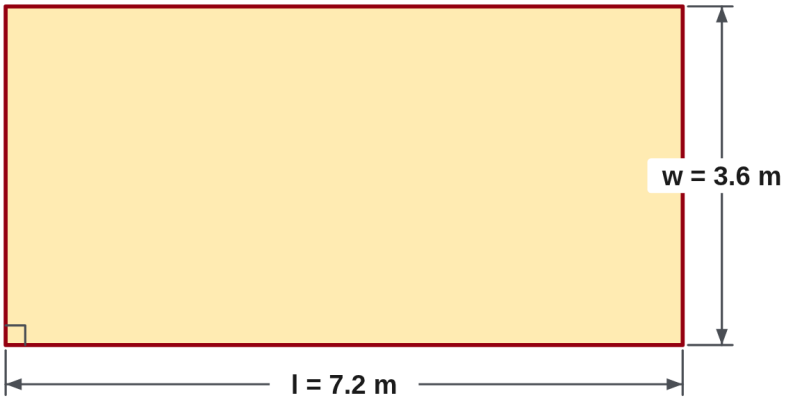

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

Scale drawings and weekly check

Day 13 • 2026-11-19 • 15 questions

07 The pictured real floor is 3.6 m wide. At 1:100 scale, what is its drawing width in millimetres? Use 1 m = 1000 mm.

Shape Canvas

Answer (mm)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

08 A drawing length is 48 mm at 1:25 scale. Find the real length in millimetres.

Answer (mm)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

09 A real length is 1800 mm. Find its drawing length at 1:20 scale.

Answer (mm)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

Scale drawings and weekly check

Day 13 • 2026-11-19 • 15 questions

10 A 1:50 drawing shows two adjoining lengths of 24 mm and 36 mm. Find their combined real length in metres. Use 1000 mm = 1 m.

Answer (m)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

11 APPLY & CHECK

A 1:50 drawing has an overall line of 120 mm and a known section of 45 mm. Find the remaining real length in millimetres.

Answer (mm)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

12 A cut list requires four real lengths represented by 32 mm each on a 1:25 drawing. Ignore kerf. Find the total real length in metres. Use 1000 mm = 1 m.

Answer (m)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

Scale drawings and weekly check

Day 13 • 2026-11-19 • 15 questions

13 A learner multiplies a 2000 mm real length by 50 to create its 1:50 drawing length. What correction is needed?

A. Add 50 to get 2050 mm

B. Multiply by 100 instead

C. Divide 2000 by 50 to get 40 mm

D. Use 2000 mm unchanged

Choice (A–D)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

14 A 1:20 drawing shows a net material length of 85 mm. The real order needs 10% allowance. Find the order length in millimetres.

Answer (mm)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6

15 A 1:50 drawing is displayed at an unknown screen zoom. Which method gives a reliable real dimension?

A. Assume the screen is full size

B. Use its printed dimension label and the stated unit

C. Use the image width in pixels as millimetres

D. Measure the screen with a ruler and multiply by 50

Choice (A–D)

Working / reason

Textbook sections 6.8 pp.148–150; review Chapter 4–6
