Materials practice: sheeting and allowance

Day 23 • 2026-12-07 • 2:15 PM–3:30 PM

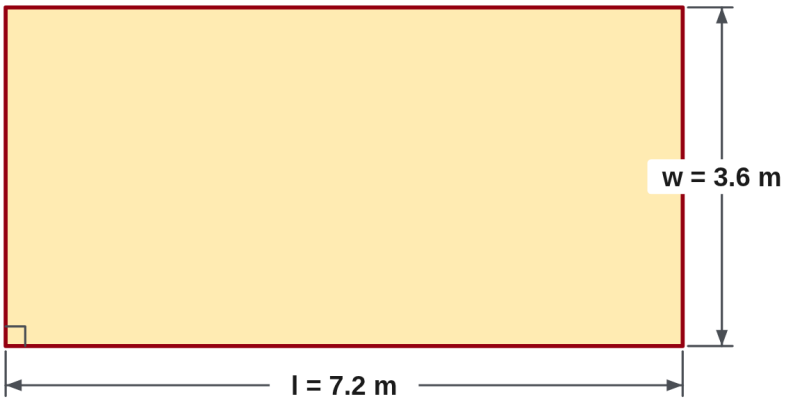

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

01 NET MATERIAL

Find the net area of the 7.2 m by 3.6 m floor shown.

Shape Canvas

Answer (m²) **Working / reason**

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

02

A rectangular sheet is 2.4 m by 1.2 m. What area does one sheet cover before waste?

Answer (m²) **Working / reason**

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

Materials practice: sheeting and allowance

Day 23 • 2026-12-07 • 15 questions

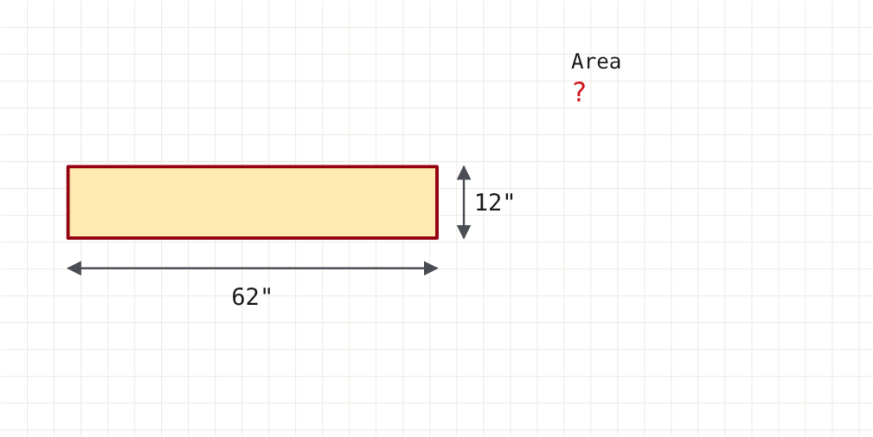

03 A Numeracy Hub area diagram is used to estimate coating. What must be known in addition to area?

A. Only the screen zoom

B. Only the triangle angle total

C. The stated coverage per tin or litre

D. Only the boundary length

Numeracy Hub

Choice (A–D)

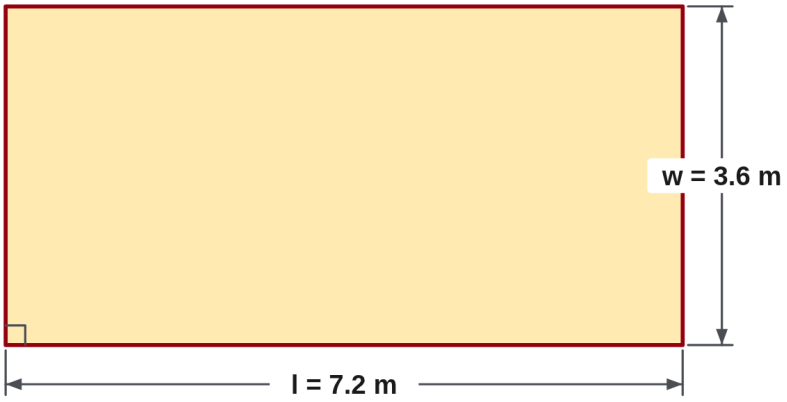

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

Materials practice: sheeting and allowance

Day 23 • 2026-12-07 • 15 questions

04 Using 2.88 m² per sheet, how many sheets equal the shown floor’s 25.92 m² net area?

Shape Canvas

Answer (sheets)

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

05 A class exercise states a 10% allowance. What quantity is multiplied by 0.10?

A. The stated net requirement

B. The allowance percentage itself

C. Only the final rounded integer

D. The diagonal angle

Choice (A–D)

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

Materials practice: sheeting and allowance

Day 23 • 2026-12-07 • 15 questions

06 ORDER QUANTITIES

Apply a stated 10% classroom allowance to a 9-sheet base. What is the unrounded requirement?

Answer (sheets) | **Working / reason**

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

07 The unrounded requirement is 9.9 sheets and only whole sheets are sold. How many should be ordered?

Answer (sheets) | **Working / reason**

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

08 A wall has net area 42 m². Add the stated 8% classroom allowance. What total area should the estimate use?

Answer (m²) | **Working / reason**

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

09 One tin covers 12 m². A surface needs 53 m² of coverage in one coat. How many whole tins are required?

Answer (tins) | **Working / reason**

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

Materials practice: sheeting and allowance

Day 23 • 2026-12-07 • 15 questions

10 A 30 m² surface needs two coats. Each tin covers 18 m² for one coat. Find the whole-tin quantity.

Answer (tins)

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

11 CHECK THE ALLOWANCE

Why should 9.9 sheets be rounded up rather than to the nearest whole number as a general purchase rule?

A. A fractional sheet requirement still needs a full purchased sheet

B. All decimal answers should always increase

C. The net area is irrelevant

D. Nine sheets are always enough

Choice (A–D)

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

12 Does a stated classroom allowance automatically establish a standard allowance for every site job?

A. Yes; 10% applies to every job

B. Yes; if the calculator has a percent key

C. Only if dimensions use metres

D. No; use the allowance specified for the actual task

Choice (A–D)

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

Materials practice: sheeting and allowance

Day 23 • 2026-12-07 • 15 questions

13 A base of 9 sheets becomes an order of 10 sheets. How many whole sheets above the base is that?

Answer (sheets)

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

14 A learner rounds each partial calculation upward several times. What is the better approach for a material estimate?

A. Remove the allowance

B. Keep intermediate precision and round the final purchase quantity upward

C. Round every multiplication upward

D. Round all lengths downward

Choice (A–D)

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254

15 The 9-sheet base covers 25.92 m². What area does a stated 10% allowance add?

Answer (m²)

Working / reason

Textbook sections 6.4 pp.142–143; Chapter 10 pp.242–254
