Mixed-topic calculation practice

Day 24 • 2026-12-10 • 10:30 AM–12:00 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

01 READ AND CHOOSE

What should you identify before calculating a mixed-topic question?

A. The required quantity, unit and relevant given values

B. The longest number only

C. The first calculator key only

D. The colour of the diagram

Choice (A–D) _____ **Working / reason** _____

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

Mixed-topic calculation practice

Day 24 • 2026-12-10 • 15 questions

02 A Numeracy Hub question requests a length to two decimal places. When should the final rounding occur?

A. Before every multiplication

B. Before reading the units

C. Only when the answer is an integer

D. After completing the calculation with full intermediate precision

Numeracy Hub

Choice (A–D)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

Mixed-topic calculation practice

Day 24 • 2026-12-10 • 15 questions

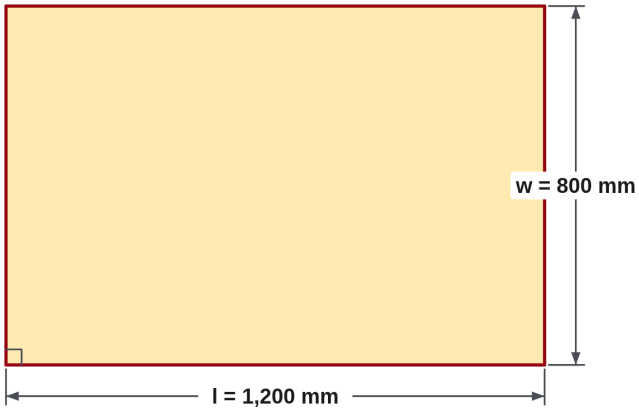

03 The 1200 mm by 800 mm panel needs edge trim. Which quantity is required?

A. Volume

B. Percentage grade

C. Perimeter

D. Area

Shape Canvas

Choice (A–D)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

Mixed-topic calculation practice

Day 24 • 2026-12-10 • 15 questions

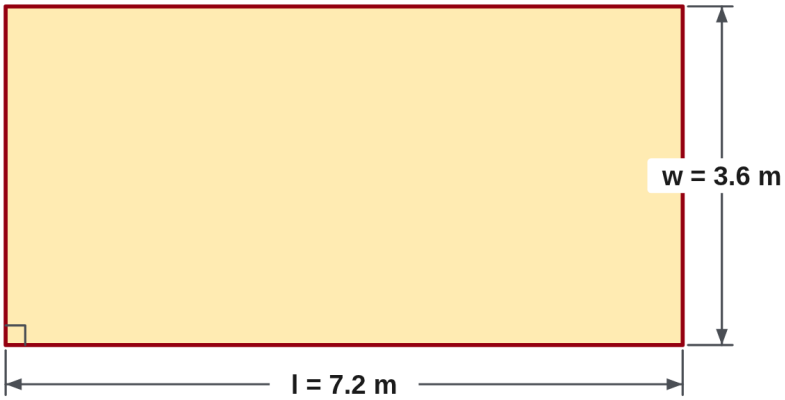

04 The 7.2 m by 3.6 m floor needs surface covering. Which quantity is required?

A. Linear offcut

B. Area

C. Perimeter

D. Angle sum

Shape Canvas

Choice (A–D)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

05 A generated tool question includes a skill not yet taught. What is the appropriate classroom response?

A. Select a taught replacement or mark it not yet taught

B. Count it automatically as a failure

C. Guess without recording the issue

D. Assume the unfamiliar formula is required

Choice (A–D)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

Mixed-topic calculation practice

Day 24 • 2026-12-10 • 15 questions

06 MIXED CALCULATIONS

Calculate 7 + 3 × 6.

Answer | **Working / reason**

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

07

Calculate 5/8 + 1/4.

Answer | **Working / reason**

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

08

Convert 3.5 inches to millimetres using 25.4 mm per inch.

Answer (mm) | **Working / reason**

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

09

A rectangle’s area is 30 m² and its length is 7.5 m. Find its width.

Answer (m) | **Working / reason**

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

Mixed-topic calculation practice

Day 24 • 2026-12-10 • 15 questions

10 A right triangle has legs 7 m and 24 m. Find its hypotenuse.

Answer (m)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

REVIEW AND RETRY

11 A solution has a correct number but no units. What should be added?

A. The unit for the requested quantity

B. An unrelated formula

C. A second random number

D. A different calculator brand

Choice (A–D)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

12 When should Check my answers be used for an independent mixed-topic set?

A. Before every first attempt

B. Instead of reading the questions

C. Only after deleting the working

D. After completing the set and retaining the written methods

Choice (A–D)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

Mixed-topic calculation practice

Day 24 • 2026-12-10 • 15 questions

13 A result claims that 2.5 m equals 250 mm. What is the correct millimetre value?

Answer (mm)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

14 Which follow-up best tests repair of a missed percentage problem?

A. Read only the final answer aloud

B. Solve a fresh percentage problem with new numbers independently

C. Copy the same answer five times

D. Attempt an unrelated untaught topic

Choice (A–D)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed

15 Check a 4 m width for a 7.5 m-long rectangle by calculating its area.

Answer (m²)

Working / reason

Textbook formula sheet p.361; conversion factors pp.362–363; relevant chapters as needed
