Corrections and a personal practice plan

Day 26 • 2026-12-16 • 10:30 AM–12:00 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

01 EXPLAIN THE ERROR

A learner got 1/3 + 1/6 = 2/9. Which correction explains the error?

A. Rewrite 1/3 as 2/6 before adding

B. Add 3 and 6 again

C. Multiply the final answer by 9

D. Use the larger denominator as the numerator

Choice (A–D) _____ **Working / reason** _____

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

Corrections and a personal practice plan

Day 26 • 2026-12-16 • 15 questions

02 A Numeracy Hub result differs from the written answer. What should be compared first?

A. Only the colours of the screens

B. Only which answer is larger

C. Only the time taken

D. The entered expression, values, units and written method

Numeracy Hub

Choice (A–D)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

Corrections and a personal practice plan

Day 26 • 2026-12-16 • 15 questions

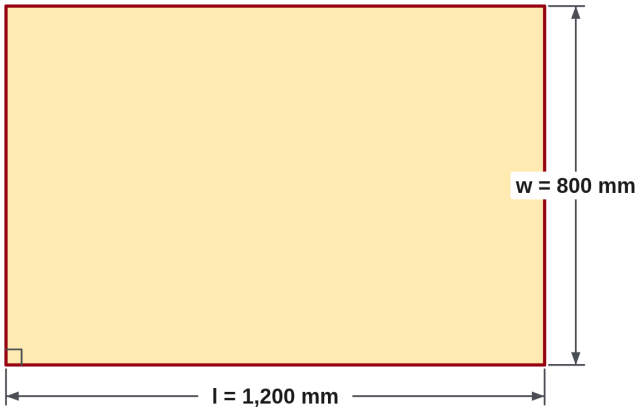

03 For the shown panel, a learner wrote area = 2(1200 + 800). What was actually calculated?

A. Volume

B. Percentage grade

C. Perimeter

D. Area

Shape Canvas

Choice (A–D)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

04 A learner used $10^2 + 6^2$ to find a leg when 10 m is the hypotenuse. Which correction is needed?

A. Leave the addition unchanged

B. Use sqrt($10^2 - 6^2$)

C. Use 10 + 6

D. Use sqrt($6^2 - 10^2$)

Choice (A–D)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

Corrections and a personal practice plan

Day 26 • 2026-12-16 • 15 questions

05 What is the strongest evidence that a corrected skill can be used independently?

A. A fresh, unaided solution with correct method and units

B. A copied answer-key number

C. The same solution traced over

D. A high score with no working

Choice (A–D)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

06 FRESH CORE CHECKS

Fresh fraction check: calculate 3 1/4 − 1 5/8.

Answer

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

07 Fresh conversion check: convert 6.5 inches to millimetres using 25.4 mm per inch.

Answer (mm)

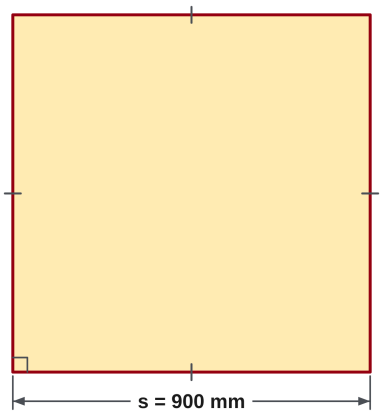

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

Corrections and a personal practice plan

Day 26 • 2026-12-16 • 15 questions

08 Fresh area check: find the area of the 900 mm square shown.

Shape Canvas

Answer (mm²)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

09 Fresh missing-leg check: a right triangle has hypotenuse 13 m and one leg 5 m. Find the other leg.

Answer (m)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

10 Fresh formula check: area is 42 m² and length is 7 m. Find the width.

Answer (m)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

Corrections and a personal practice plan

Day 26 • 2026-12-16 • 15 questions

11 BUILD THE NEXT PLAN

Which practice-plan entry is most specific?

A. Revisit fraction regrouping in the textbook, solve three fresh differences, then check one unaided

B. Study more sometime

C. Get every answer from the tool first

D. Avoid all fractions

Choice (A–D)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

12 A learner has two priority errors. What should the next independent check include?

A. Only the easiest unrelated topic

B. Every question ever attempted

C. Only a copied worked example

D. One fresh question in each priority skill

Choice (A–D)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

13 A corrected width is 6 m and length is 7 m. Calculate the area to verify the width.

Answer (m²)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

Corrections and a personal practice plan

Day 26 • 2026-12-16 • 15 questions

14 Which information should be kept from a new Numeracy Hub practice set?

A. Only the highest score ever obtained

B. The set code or questions, working and correction notes

C. Only the number of clicks

D. Only the browser window size

Choice (A–D)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368

15 A learner still cannot solve the fresh question independently. What is a useful next step?

A. Identify the remaining difficult step and seek focused explanation before another retry

B. Label the learner permanently unable

C. Hide all working

D. Repeat the exact answer without explanation

Choice (A–D)

Working / reason

Textbook relevant chapters from readiness errors; formula sheet p.361; glossary pp.364–368
